Ravishankar (Ravi) Rao, MPH, MPA, is an Environmental Epidemiologist working at the U.S. Environmental Protection Agency (EPA), Office of Targeting, Data & Measure within the Enforcement and Compliance Assurance Division, Atlanta, Georgia. Mr. Rao earned a Bachelor of Science in Biology from Tuskegee University, master's degree in Public Health from University of Alabama at Birmingham, and a master's degree in Healthcare Administration from Auburn University at Montgomery. Ravi has worked in several State Health Departments as an Epidemiologist: Alabama Department of Health, Indiana State Department of Health, and the Ohio Department of Health. Also, he has worked at the Agency for Toxic Substance & Disease Registry/CDC and conducted several large-scale environmental health studies.

Ravi has considerable knowledge of Geographical Information System (GIS) and computer/data scientist skills along with Epidemiological methods to address environmental issues such as lead in children, multimedia (air, water, land) analyses and environmental targeting studies. He has been working for Region 4 EPA for more than 20 years and has been providing support to the Environmental Justice Office in giving overview and training on the usage of (GIS) and EJSCREEN tool to other scientists
