GreenScapes
Environmentally Beneficial Landscaping

Registration Form

The ***GreenScapes*** Alliance Program is designed to help preserve natural resources and prevent waste and pollution by encouraging companies, government agencies, and other entities to make more holistic decisions regarding waste generation and disposal and the use of land, water, pesticides, and energy. By focusing on the "4 R's" - reduce, reuse, recycle, and rebuy - this program can help improve both an organization's bottom-line and the environment. *GreenScapes* will promote practices and products that still meet users' needs but have better environmental profiles than current methods. *GreenScapes* will develop resources such as technical assistance publications, workshops, and a Web site. Organizations can participate in *GreenScapes* as **Partners** and/or **Allies**:

Partners include companies, agencies, and others who, in joining the program, commit to undertaking a minimum of two *GreenScapes* activities.

Allies include professional groups, trade associations, research organizations, and product manufactures or marketers who, in joining the program, will work with their affiliated organizations to promote greater use of *GreenScapes* activities.

Both Partners and Allies will be eligible for awards recognizing their activities, particularly documented increases in pollution prevention and the preservation of natural resources in landscaping.

For more information, visit the GreenScapes Web site at: www.epa.gov/greenscapes

YES! My organization is ready to join *GreenScapes*!

Membership Type: ☐ **Partner** ☐ **Ally**
