RESEARCH TRIANGLE INSTITUTE

July 1993

EVALUATION OF POTENTIAL BIOLOGICAL EMISSIONS FROM ALTERNATIVE MEDICAL WASTE TREATMENT TECHNOLOGIES

FINAL REPORT

Prepared for:

Office of Solid Waste
U.S. Environmental Protection Agency
Washington, DC 20460

EPA Contract Number 68-WO-0032
RTI Project Number 94U-5400-24A (3)

POST OFFICE BOX 12194 RESEARCH TRIANGLE PARK, NORTH CAROLINA 27709-2194

RTI Report Number
94U-5400-24A (3)

EPA Contract Number
68-WO-0032

EVALUATION OF POTENTIAL BIOLOGICAL EMISSIONS FROM ALTERNATIVE MEDICAL WASTE TREATMENT TECHNOLOGIES

July 1993

Prepared for

Work Assignment Leader: Kristina Meson
Office of Solid Waste
U.S. Environmental Protection Agency
Washington, DC 20460

Prepared by

Eugene C. Cole
Keith E. Leese
Richard M. Hall

Research Triangle Institute
Research Triangle Park, NC 27709

Submitted by:

Deborah L. Franke, Manager
Environmental Microbiology Department

Approved by:

Dennis F. Naugle, Director
Center for Environmental Analysis

DISCLAIMER

The research presented in this document has been funded by the United States Environmental Agency under contract number 68-WO-0032. It is a final report that has not been subject to the Agency's peer and administrative review. Mention of trade names or commercial products does not constitute endorsement or recommendation for use by the U.S. Environmental Protection Agency or the Research Triangle Institute (RTI). The views expressed in this document are those of the authors and do not represent official RTI or Agency policy.

THIS REPORT WAS PRINTED ON RECYCLED PAPER

ACKNOWLEDGEMENTS

This document was prepared as the draft final product of Work Assignment No. 24, Medical Waste Treatment Technologies Evaluation, under U.S. EPA Contract No. 68-WO-0032.

The authors wish to express their appreciation to Kristina Meson, whose assistance as EPA Work Assignment Manager throughout the project helped guide this work to a successful completion. In addition, they wish to acknowledge Lynda McBroom for her administrative support, and those individuals and their medical waste treatment facilities who made this study possible.

TABLE OF CONTENTS

Section		Page
Executive Summary		viii
1.0	Introduction	1
2.0	Literature Review	1
	2.1 Indicator Microorganisms	1
	2.2 Bioaerosol Sampling Methods	2
3.0	Indicator Microorganisms	2
	3.1 Background	3
	3.2 Approach	4
	3.3 Test Organisms	4
	3.4 Media and Reagents	5
	3.5 Evaluation of Recovery Media	6
	3.5.1 Growth and Quantitation of Test Organisms	7
	3.6 Spore Survival During Aerosol Sampling	10
	3.6.1 Survival of Uninjured Spores	10
	3.6.2 Survival of Injured Spores	12
	3.6.3 Spore Slippage from AGI-30s	14
	3.7 Discussion	16
	3.8 Indicator Microorganism Recovery Recommendations	16
4.0	Sampling Approach	17
	4.1 Indicator Microorganisms	17
	4.2 Media and Reagents	18
	4.3 Bioaerosol Samplers	19
	4.4 General Sampling Plan	19
	4.5 Indicator Organism Recovery	20
5.0	Treatment Technologies, Sites, and Sampling Schedule	21
6.0	On-Site Steam Autoclave Sampling Plan	22
	6.1 Sampling Points	22
	6.2 Microbial Challenge	22
	6.3 Air and Fluid Sampling	24
	6.4 Results	24
