Conference Objectives

1. *Enhance scientific information and data exchange on current state-of-the-art research for methyl bromide alternatives.*

2. *Provide a forum for cross scientific disciplines and cross agricultural commodity information exchange.*

3. *Develop and provide conference proceedings as an information source on the state-of-the-art methyl bromide alternatives to Legislators, Government Policy Officials, Researchers, Users of methyl bromide and all other interested sources.*

4. *Provide a central focus for data gathering on potential alternatives for methyl bromide for future evaluation and prioritization.*

5. *Monitor annually the status for development of viable alternatives for methyl bromide uses.*

6. *Evaluation of technology transfer and incentive programs for implementation of proposed alternatives.*
