Re: Iss inspection of Bio-Lab, Inc. plant on 3-29-83
GAD 991 274 820

Dear Mr. Eckles:

Please reference the inspection of the above plant by Mr. George Morris of the Industrial and Hazardous Waste Management Program to determine the compliance status with Georgias' Rules for Hazardous Waste Management, Sections 391-3-11-.05. Financial Responsibility and 391-3-11-.10. Standards for owners and operators of Hazardous Waste Treatment, Storage, & Disposal Faciltities. Violations noted during the inspections were discussed with you and Mr. Alan C. Summer, Regulatory Manager and a notice of violation letter has been prepared.

During the plant inspection, it was determined that your plant does not regularly generate a regulated hazardous waste stream and you could possibly withdraw your part A application for a Hazardous Waste permit and request classification as a generator or small quantity generator. Since this decision is pending, we will hold in abeyance, for 30 days from your receipt of this letter, any further actions on the Notice of Violation proceeding.

Please respond accordingly and should you have any questions in the interim, please call 656-7802.

Sincerely,

Howard L. Barefoot
Unit Coordinator
Industrial & Hazardous Waste
Management Program
