Worland, Wyoming 82401

Re: Termination of Administrative Order
Pursuant to Section 7003 of RCRA
Docket No. RCRA-08-2003-0003

Dear Mr. King:

On June 6, 2007, representatives of the United States Environmental Protection Agency (USEPA), the United States Fish and Wildlife Service (USFWS) and the Wyoming Department of Environmental Quality (WDEQ) conducted an inspection of the Oilfield Disposal Services Commercial Oilfield Waste Disposal Facility (Facility) to determine compliance with the above-referenced order (Order). The aforementioned representatives observed that Oilfield Disposal Services has installed and is properly maintaining adequate netting over the horizontal half tanks. All of the crude oil/oil emulsion on the surface and along the shoreline of the evaporation pond has been removed in compliance with the corrective measures described in the USEPA-approved workplan submitted pursuant to the Order. Because the USEPA representative has observed Oilfield Disposal Services' physical compliance with the Order, USEPA has determined that it is unnecessary for Oilfield Disposal Services to submit the Corrective measures Summary Report (CMSR) as required in paragraph VII.A.8. of the Order.

Based on the observations made during the inspection, USEPA has determined that Oilfield Disposal Services has demonstrated that the requirements of the Order have been met. Therefore, pursuant to section XXI. of the Order, the Order is terminated. However, we direct your attention to section X. for a description of Oilfield Disposal Services' ongoing record preservation responsibilities.

Please remember that even though USEPA has determined that the imminent and substantial endangerment to wildlife at the Facility has been abated by the installation of adequate netting and removal of surface and shoreline oil/oil emulsion, Oilfield Disposal Services has a continuing obligation to prevent access by wildlife to oil/oil emulsion in the horizontal half tanks and on the surface/shoreline of the evaporation pond. USEPA, USFWS and WDEQ inspectors will continue to include Oilfield Disposal Services in our Wyoming commercial oilfield wastewater disposal facilities and oilfield production facilities inspection schedule.

In closing, if you have any comment(s) or question(s) concerning this matter please feel free to contact Randy Lamdin of the USEPA Region 8 Technical Enforcement Program at (303) 312-6350 or Brenda Morris of the Legal Enforcement Program at (303) 312-6891.

Sincerely,

Sharon L. Kercher, Director
Technical Enforcement Program
