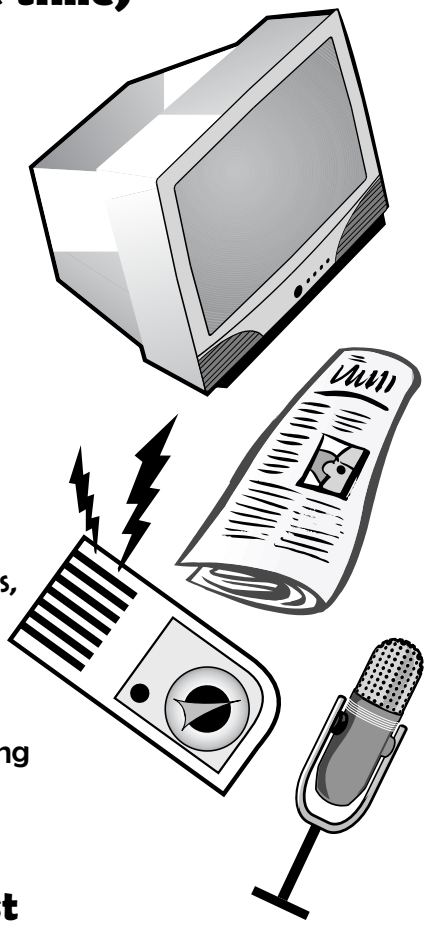
Nonpoint Source Outreach Toolbox CD-ROM

Coming Soon!

Do you need to let your community understand how they can reduce runoff pollution, but don't have the time, money, or staff to do the job right?

Let the NPS Toolbox CD-ROM help!



This special menu-driven CD-ROM, developed by the EPA/State Nonpoint Source (NPS) Outreach Workgroup, will include:

- a collection of video, audio, and print public service announcements that have proven effective or popular in other communities
- proven slogans and ready-to-use logos (b&w and color) to help unify your community's NPS outreach campaign materials
- printer-ready samples of popular posters, bookmarks, fact sheets, brochures, and more to help spread the word about how each of us can easily combat NPS pollution in our daily lives

Many of these materials are intended to be customized simply by adding contact information for your community.

Visit www.epa.gov/nps/outreach.html to get the latest information on the NPS Toolbox CD-ROM.
