Small Laboratories and Laboratory Associations

Comments about NELAP

The Environmental Laboratory Advisory Board (ELAB) has received comments from a few small laboratories (commercial and governmental) regarding the National Environmental Laboratory Accreditation Program (NELAP). Therefore, ELAB has decided to include small laboratory issues as a regular agenda item at each meeting.

ELAB is soliciting comments from small laboratory personnel and/or associations representing laboratories with regard to the impact of NELAP on their operations. Please send to the ELAB member representing small laboratories: Gary Kramer at gkramer@afo.net.

Information about the NELAP process, scheduling, etc. can be obtained from the EPA NELAC web site, from the individual NELAC committee members, and at the next conference scheduled for June 28-30, 1999 at Saratog Springs, New York.
