

A REQUEST FOR COMMENTS:

The Environmental Laboratory Advisory Board (ELAB) has formed a work group to study the issues that small, public and private laboratories may face in implementing the NELAC standards. Comments on these issues are requested.

If applicable, commenters are asked to indicate the size of the laboratory they represent. Use the categories “less than ten employees (<10)”, “between eleven to twenty-five employees (11 - 25)”, or “greater than 26 employees (>26)”.

Anyone wishing to provide comments should direct them to:
