FSIS DOCKET ROOM
99 AUG 26 PM 3:07

Dear Sirs,

In regard to how to make the food supply safer, raising animals in crowded, stressful conditions makes for sick animals, this is the major cause of salmonella, e.coli and resistant bacteria.

Healthier animals make a safer meat, milk and egg supply.

Humane treatment of farm animals is the most important step in making food safer.

(Docket 98-045N)

thank you,

Donna Matthews
