Brad Theurer
Environmental Engineer
Autoliv ASP, Inc.
3350 Airport Road
Ogden, Utah 84405

Dear Mr. Theurer:

Re: Autoliv's Implementation of Project XL as sponsored by EPA

The Box Elder County Commission has reviewed Autoliv's proposal to burn their waste propellants in the metals recovery facility at the Promontory location.

The Commission feels that the processing of the waste materials through the air pollution control equipment associated with the metals recovery facility will be a more sound method of destruction than the present method of open burning. We encourage EPA to cooperate with Autoliv and to allow implementation of the project to help make our County and communities a cleaner and more desirable place to live.

The Commission commends Autoliv for its efforts to improve the environment and to safely handle their waste materials. We are interested in the progress of this project and would appreciate information as to its future success.

Sincerely,

Royal K. Norman, Chairman
Box Elder County Commission

R. Lee Allen
Commissioner
