EPA Reviews Cleanup
Old City of York Landfill

The U.S. Environmental Protection Agency (EPA) is conducting a fourth Five-Year Review of the Old City of York Landfill Superfund Site located just outside Seven Valleys in York County. EPA inspects sites regularly to ensure that cleanups conducted remain fully protective of public health and the environment. The prior review conducted in 2011 determined the cleanup remedy was protective in the short-term but iron levels needed to be addressed to ensure long-term protectiveness. Results of this review will be available by March 2016.
