Hi Rich,
EPA is approving the PCB Groundwater Report. EPA has determined that the results provided in the report meet the 0.5 µg/L unrestricted use limit (40 CFR 761.79(b)) and no groundwater cleanup proposal is warranted. The PCB Groundwater Report can be incorporated into the Final Cleanup Plan, which is due 60 days from this approval date. EPA intends to open a public comment period on the Final Cleanup Plan. The Final Cleanup Plan should contain all amendments noted and referenced in the RBDAA application, so the public has access to all necessary information in one document. Please let us know if you have any questions or if you'd like to discuss.
Thank you,
Amanda
