---

Dear Chairman Lewis,

I'm writing to let you know that EPA Region 10 is opening the public comment period for the draft title V air permit for Neucor, Inc. My colleague Karl Pepple reached out to you on May 6, 2026, to notify you of the opportunity for consultation. The public notice associated with the proposed action is attached along with the draft permit and statement of basis. The entire administrative record is available online starting August 13, 2026. Go to https://www.epa.gov/caa-permitting/caa-permitting-epas-pacific-northwest-region and click on the link associated with the Neucor, Inc. draft permit under the public comment opportunities. The public comment period for the proposed action closes on September 12, 2026. We are hopeful to be able to address comments after the comment period and issue a final permit that reflects successful operations at the facility in full compliance with Clean Air Act requirements.

As always, please call me directly with any questions on this or any other air matters.

Very Respectfully,

Angeles Herrera, Director
Air and Radiation Division
US EPA, Region 10
Seattle, WA 98101
