

Partnership Agreement: Manufacturers

Section I: EPA WaterSense® Program Goals

The EPA WaterSense program aims to use water resources more efficiently to preserve them for future generations and to reduce water and wastewater infrastructure costs by reducing unnecessary water consumption. Through this program, EPA provides reliable information on high-performing, water-efficient products and practices, raises awareness about the importance of water efficiency, ensures water-efficient product performance, helps consumers identify products and services that use less water, promotes innovation in product development, and supports state and local water-efficiency efforts.

Section II: Partnership Pledge

As an EPA WaterSense program partner, _____ (name of manufacturer) shares EPA's goals as outlined above and is proud to commit to the following activities to further these goals:

1. Have at least one product certified to conform to a WaterSense specification within 12 months of execution of this partnership agreement. **Notes: A draft or final specification for a product the partner manufactures must be available before signing this agreement. Product must be sold or planned to be sold in the United States within one year of signing this agreement.**
2. Have products certified to conform to the relevant WaterSense specification and receive permission to use the WaterSense label by a licensed certifying body accredited in accordance with the WaterSense product certification system. Inform the licensed certifying body of the brand names, model names, and model numbers for any products that are private labeled by another company.
3. Notify EPA when new products, including those products that are private labeled by another company, are certified to WaterSense specifications by providing the brand name, model name, model number(s), and name of the licensed certifying body and associated file number.
4. Educate consumers on the value of water efficiency, the importance of saving water, and the meaning of the WaterSense label. Where feasible, undertake activities and events to achieve mutual WaterSense goals.
5. Make available to EPA annual data on WaterSense labeled products in categories where the EPA WaterSense program has established specifications, including unit shipment data, total unit shipments for each model in the product line, and percent of total unit shipments that are WaterSense labeled. This data may be provided directly to EPA or to a third-party organization with the understanding that neither EPA nor this organization will release individual manufacturer data, but rather aggregate industrywide data on the relative market share of labeled vs. non-labeled products.
6. Adhere to WaterSense program mark guidelines and ensure that authorized representatives, such as advertising agencies, distributors, and subcontractors, also comply. Help EPA maintain program integrity by alerting EPA or relevant licensed certifying bodies to possible misuse(s) of the WaterSense program marks.
7. Update EPA annually on the availability of labeled products and inform EPA in a timely manner if labeled products are discontinued and/or no longer meet applicable criteria, so EPA can maintain an up-to-date list of labeled products on the program Web site and in other materials.
8. Grant the EPA WaterSense program permission to include company name on a list of participating partners on the WaterSense Web site, program materials, and announcements. Also grant permission to the program to provide information (such as brand name, make, model, Web link, and product features) for labeled products on the Web listing and program materials. Partners understand that from time to time, EPA will be interested in profiling partner accomplishments in case studies and articles. If selected for such promotion, partners will have the opportunity to provide input and review the final print or Web document before EPA releases it to the public. Further, partners understand that EPA might refer media contacts interested in publicizing water efficiency to them for information about products and accomplishments.

Section III: EPA WaterSense Program's Commitments to Partners

1. Develop national specifications for water-efficient products and programs through an open, public process.
2. Increase awareness of the EPA WaterSense brand by distributing key messages on the benefits of labeled products and programs, as well as the importance of water efficiency.
3. Provide current EPA WaterSense program news, information, and reference documents (via the program Web site, helpline, e-mail, or other means), including a listing of labeled products on the Web site.

4. Provide WaterSense program partners with public recognition for their involvement in the program and role in protecting the environment through online listing of partners, special awards, and other efforts. This recognition includes, but is not limited to listing partners and WaterSense labeled products on the program Web site.
5. Respond swiftly to partner requests for information or clarification on EPA WaterSense program policies.
6. Review pre-press promotional items, draft Web sites, packaging or other materials that use the WaterSense label, upon request.

Section IV: General Terms and Disclaimers

1. The partner will not construe, claim, or imply that its participation in the EPA WaterSense program constitutes federal government (EPA) approval, acceptance, or endorsement of anything other than the partner's commitment to the program.
2. Nothing in this agreement, in and of itself, obligates the EPA to expend appropriations or to enter into any contract, assistance agreement, interagency agreement, or incur other financial obligations that would be inconsistent with Agency budget priorities. The partner agrees not to submit a claim for compensation for services rendered to EPA or any Federal Agency in connection with any activities it carries out in furtherance of this agreement
3. The partner and the EPA WaterSense program will assume good faith as a general principle for resolving conflict and will seek to resolve all matters informally, so as to preserve maximum public confidence in the program.
4. Failure to comply with any of the terms of this partnership agreement can result in its termination and cessation of access to the benefits of the program, including use of the program marks.
5. The EPA WaterSense program will actively pursue resolution of noncompliance related to the use of the program marks.
6. Both parties concur that this agreement is wholly voluntary and may be terminated by either party at any time, and for any reason, with no penalty. Termination will begin effective immediately upon written notice to or from the EPA WaterSense program. Upon the termination of this agreement, partners agree to remove program marks in a timely manner, consistent with the WaterSense program mark guidelines.

To be completed by partner

Authorized Partner Representative¹ (printed name): _____

Title: _____ E-mail: _____

Signature: _____ Date: _____

Company Name: _____ Number of employees: _____

Industry/SIC/NAICS code: _____

What products do you manufacture? Toilets Bathroom Sink Faucets Urinals Showerheads
 Pre-Rinse Spray Valves Weather-Based Irrigation Controllers

Primary Contact: Dr./Mr./Mrs./Ms. _____ Suffix: _____
