---

Dear Mr. Fujii,

EPA Region 10 has issued the initial title V air operating permit to Neucor, Inc. on the Yakama Reservation. Please find the permit and statement of basis attached.

One comment was received during the public comment period. Because a comment was received, the final permit decision becomes effective 30 days after issuance pursuant to 40 CFR 71.11(i)(2).

Petitions for review of the title V permit must be filed with the Environmental Appeals Board, as set forth in 40 CFR 71.11 and 40 CFR 124.19. If a timely petition for review is filed, the specific terms and conditions of the title V permit which are the subject of the request for review shall be stayed.

If you would like a permit engineer to walk you through the requirements within this permit, please reach out to Geoffrey Glass, copied on this email.

Please confirm receipt of these files.

Thank you,

KP
