

## Question 15.6

**Topic:** Missing Data Substitution

**Question:** For a block of missing flow or NO<sub>x</sub> data, should the highest load bin recorded be used as the trigger for performing each data substitution under the missing data routine?

**Answer:** No. Select each data substitution value from the load bin corresponding to the unit load recorded for that particular hour of missing data.

**References:** §§ 75.31 - 75.33

**Key Words:** Missing data

**History:** First published in May 1993, Update #1, Revised February 2005
