

## Risk-Based Prioritizations Under Development in FY2009

(this list is a planning stage projection and is subject to change)

EPA is developing risk-based prioritizations (RBPs) for chemicals with hazard data gathered under the HPV Challenge Program or the OECD HPV Programme, and use and exposure information reported under the IUR; principally High Production Volume (HPV) chemicals. More information about how RBPs are developed can be found at:
