FRS DATA ELEMENT NAME	FRS DATA ELEMENT DEFINITION	FORMAT	TABLE NAME.COLUMN NAME {COMMENTS}
<p>Program Facility</p> <p>Basic identification information for a facility site, as reported by an information management system for an environmental program.</p> <p>Remarks: The eGRID2010 year 2007 plant and aggregation files and file structure document (ZIP) was downloaded from the EGRID website (http://www.epa.gov/cleanenergy/energy-resources/egrid/index.html). The ZIP file contained 2 data files and a PDF file consisting of technical documentation. The eGRID2010V1_0_year07_PLANT.xls file had a spreadsheet, "Year 2007 eGRID Plant, Boiler, and Generator Data Files", containing three worksheets. The third worksheet, <i>PLNT07</i>, contained all the data needed for this crosswalk. The data was released February, 2011. Although the environmental data (energy, emissions, etc.) covers the year 2007, the facility identification data is current to December 31, 2010. As stated in the Technical Support Document, "eGRID2010's year 2007 data have been reconfigured to reflect the industry's current structure as was known by December 31, 2010; including plant ownership and operators, parent company affiliations, company mergers, and grid configurations."</p>			
Environmental Information System Abbreviated Name	The abbreviated name that represents the name of an information management system for an environmental program.	A(20)	'EGRID'
Environmental Information System Identification Number	The identification number, such as the permit number, assigned by an information management system that represents a facility site, waste site, operable unit, or other feature tracked by that Environmental Information System.	A(30)	DOE/EIA ORIS plant or facility code (ORISPL) ⁱ
Facility Site Name	The public or commercial name of a facility site (i.e., the full name that commonly appears on invoices, signs, or other business documents, or as assigned by the state when the name is ambiguous).	A(80)	Plant name (PNAME)
Location Address	The address that describes the physical (geographic) location of the front door or main entrance of a facility site, including urban-style street address or rural address.	A(50)	
Supplemental Location Text	The text that provides additional information about a place, including a building name with its secondary unit and number, an industrial park name, an installation name or descriptive text where no formal address is available.	A(50)	
Locality Name	The name of the city, town, village or other locality, when identifiable, within whose boundaries (the majority of) the facility site is located. This is not always the same as the city used for USPS mail delivery.	A(60)

FRS DATA ELEMENT NAME	FRS DATA ELEMENT DEFINITION	FORMAT	TABLE NAME.COLUMN NAME {COMMENTS}
County and State FIPS Code	The code that represents the county or county equivalent and the state or state equivalent of the United States.	A(5)	Plant FIPS state code Plant FIPS county code (FIPSST FIPSCNTY)
County Name	The name of the U.S. county or county equivalent in which the facility site is physically located.	A(35)	Plant county name (CNTYNAME)
State USPS Code	The U.S. Postal Service abbreviation that represents the state or state equivalent for the U.S. and Canada.	A(2)	Plant state abbreviation (PSTATABB)
State Name	The name of a principal administrative subdivision of the United States, Canada, or Mexico.	A(35)	
Country Name	The name that represents a primary geopolitical unit of the world. <i>Default: USA</i>	A(44)	'USA'
Location ZIP Code	The combination of the 5-digit Zone Improvement Plan (ZIP) code and the four-digit extension code (if available) that represents the geographic segment that is a subunit of the ZIP Code, assigned by the U.S. Postal Service to a geographic location; or the postal zone specific to the country, other than the U.S., where the facility site is located.	A(14)	
Location Description	A brief explanation of where the facility site is located, including navigational directions and/or more descriptive information about the location of the facility site.	A(256)	
Federal Facility Indicator Code	Code indicating whether or not the facility is the property of the Federal Government. <i>Allowable Values:</i> <u>Value</u> <u>Meaning</u> Y Yes, the facility is the property of the Federal Government. N No, the facility is not the property of the Federal Government	A(1)	
Federal Agency Code	The Federal Agency/Bureau code. The five character code consists of a letter followed by four numbers. There are four possible letters that can occupy the first character position: 'C' for Civilian Federal Agency; 'D' for Department of Defense; 'E' for Department of Energy; 'X' for Unknown. The second and third characters represent the agency code, while the fourth and fifth characters represent the bureau code.	A(5)

Tribal Land Indicator Code	Code indicating whether or not the facility site is located on tribal land.	A(1)	
Tribal Land Name	The name of an American Indian or Alaskan native area where the facility site is located.	A(200)	
Congressional District Number	The number that represents a Congressional District for a state within the United States.	A(2)	
Legislative District Number	The number that represents a Legislative District within a state.	A(2)	
Hydrologic Cataloging Unit (HUC) Code	The hydrologic unit code (HUC) that represents a geographic area representing part or all of a surface drainage basin, a combination of drainage basins, or a distinct hydrologic feature.	A(8)	
Airshed Code	An area of varying size that is dependent on a single air mass and that is uniformly affected by the same sources of air pollution.	A(5)	
Census Block Code	The smallest entity for which the Census Bureau collects and tabulates decennial census information; bounded on all sides by visible and non-visible features shown on Census Bureau maps.	A(15)	
EPA Region Code	The code that represents an EPA region.	A(2)	
Facility Site Type Name	The descriptive name for the type of site the facility occupies. <u>Allowable Values:</u> Stationary Contaminated Site Mobile Contamination Addressed Monitoring Station Potentially Contaminated Site Water System Brownfields Site	A(40)	'STATIONARY'
Small Business Indicator	Code indicating whether or not a business is requesting relief under EPA's Small Business Policy, which applies to businesses having less than 100 employees.	A(1)	
Environmental Justice Code	The code that identifies the type of environmental justice concern affecting the facility or enforcement action.	A(3)	
Source of Data	The source of the associated program facility data.	A(25)	'EGRID'

Public Indicator	Indicates whether or not the associated data is accessible by the public on the internet.	A(1)	
Geographic Coordinates			
A geographic point or set of points, defined by latitude and longitude coordinates used to locate a facility site, usually the front door or centroid, including the associated method, accuracy, and description data.			
Latitude Measure	The measure of the angular distance on a meridian north or south of the equator.	N(9,6)	If County centroid flag (CCFLAG) <> '1' , then Plant latitude (LAT) Else, null
Longitude Measure	The measure of the angular distance on a meridian east or west of the prime meridian.	N(10,6)	If County centroid flag (CCFLAG) <> '1' , then Plant longitude (LON) Else, null
Horizontal Accuracy Measure	The measure of the accuracy (in meters) of the latitude and longitude coordinates.	N(5)	
Geometric Type (Textual Data or Code Data acceptable)			
Code	The code that represents the geometric entity represented by one point or a sequence of latitude and longitude points.	A(3)	
Name	The name that identifies the geometric entity represented by one point or a sequence of latitude and longitude points.	A(6)	
Horizontal Collection Method (Textual Data or Code Data acceptable)			
Code	The code that represents the method used to determine the latitude and longitude coordinates for a point on the earth.	A(3)	
Text	The text that describes the method used to determine the latitude and longitude coordinates for a point on the earth.	A(60)	
Horizontal Reference Datum (Textual Data or Code Data acceptable)

ⁱ This plant code was originally developed for power plants by the Office of the Regulatory Information System (ORIS), which was a part of the Federal Power Commission. It is now assigned by the Energy Information Administration (EIS) and is used as a unique plant identification code for many EPA electric power databases. One plant code, for Laramie River, has been altered.
