

with international standards. The Commission concluded, however, that additional comment would be helpful to resolve certain issues. In a separate notice of May 30, 1996, 61 FR 27224, the Commission described the comments concerning the marking of platinum products, submitted in response to the prior FRN, and also discussed its proposed changes to this section. The Commission solicited comment on this provision of the Guides and the proposed changes, requesting comments until August 12, 1996.

On July 25, 1996, the Commission received a letter from the Manufacturing Jewelers and Silversmiths of America, Inc. (MJSA), an industry trade association, requesting that the comment period be extended for sixty days, until October 11, 1996.² MJSA stated that about eight interested platinum jewelry manufacturers met on July 21, 1996 but "those attending the meeting thought it would be helpful to survey a larger universe of platinum jewelry manufacturers than was present" at the meeting. Such a survey would require an extension of the comment period.

The Commission has determined that an extension of the comment period until September 30, 1996 is appropriate. Therefore, to allow all interested persons the opportunity to supply the Commission with written data, views and arguments concerning the Commission's review of section 23.7 of the Guides, the Commission grants an extension of the comment period to September 30, 1996.

List of Subjects in 16 CFR Part 23

Advertising; Jewelry; Trade practices.

Authority: 15 U.S.C. 41–58.

By direction of the Commission.

Clean Air Act Approval and Promulgation of SIP Elements for Denver and Longmont; Clean Air Act Reclassification; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; extension of the comment period.

SUMMARY: The Environmental Protection Agency is extending the comment period for a proposed rule published July 9, 1996 (61 FR 36004). On July 9, 1996, EPA proposed approval of the State Implementation Plan (SIP) revisions submitted by the State of Colorado for the purpose of bringing about the attainment of the national ambient air quality standards (NAAQS) for carbon monoxide (CO) in Denver and Longmont. EPA also proposed reclassification of the Denver CO nonattainment area from Moderate to Serious. These actions were requested by the State of Colorado. At the request of two organizations which wish to submit comments on these proposed actions, EPA is extending the comment period to September 9, 1996.

DATES: Comments on this proposed action must be received in writing on or before September 9, 1996.

ADDRESSES: Comments should be addressed to: Richard R. Long, Director of Air Programs (8P2–A), Environmental Protection Agency, Region VIII, 999 18th Street, Suite 500, Denver, Colorado 80202–2466.

FOR FURTHER INFORMATION CONTACT: Jeff Houk at (303) 312–6446.

Dated: August 14, 1996.

Jack W. McGraw,

Acting Regional Administrator.

Hazardous Waste Combustors; Revised Standards; Proposed Rule—Notice of Data Availability and Request for Comments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of data availability and request for comments.

SUMMARY: This document is a notice of availability and invitation for comment on the following information pertaining to the proposed revised standards for hazardous waste combustors (61 FR 17358 (April 19, 1996)): Reports from an independent peer review of technical aspects of the rule; additional analyses of various fuel oils to be used to establish a specification to exclude comparable fuels; and information on a synthesis gas process and product gas specifications that was inadvertently not included in the docket.

Readers should note that only comments about new information discussed in this document will be considered during the comment period. Issues related to the April 19, 1996 proposed rule that are not directly affected by the documents or data referenced in this Notice of Data Availability are not open for further comment.

DATES: Written comments on the peer review reports, the new comparable fuels analyses, and the synthesis gas process and product information must be submitted by September 23, 1996.

ADDRESSES: Commenters must send an original and two copies of their comments referencing Docket Number F–96–RCSP–FFFFF to: RCRA Docket Information Center, Office of Solid Waste (5305G), U.S. Environmental Protection Agency Headquarters (EPA, HQ), 401 M Street, S.W., Washington, D.C. 20460. Comments may also be submitted electronically through the Internet to: rcra-docket@epamail.epa.gov. Comments in electronic format should also be identified by the docket number F–96–RCSP–FFFFF. All electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

Commenters should not submit electronically any confidential business information (CBI). An original and two copies of the CBI must be submitted under separate cover to: RCRA CBI Document Control Officer, OSW (5305W), 401 M Street, SW, Washington D.C. 20460. For other information regarding submitting comments electronically, viewing the comments received, and supporting information, please refer to the proposed rule (61 FR 17358 (April 19, 1996)). The RCRA Information Center is located at Crystal Gateway One, 1235 Jefferson Davis Highway, First Floor, Arlington, Virginia and is open for public inspection and copying of supporting information for RCRA rules from 9:00

²MJSA is represented by Sheldon London of London & Satagaj. Mr. London's letter dated July 25, 1996 to Donald S. Clark, Secretary of the Commission, has been placed on the Commission's public record of this proceeding.

am to 4:00 pm Monday through Friday, except for Federal holidays. The public must make an appointment to view docket materials by calling (703) 603-9230. The public may copy a maximum of 100 pages from any regulatory document at no cost. Additional copies cost \$0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, call the RCRA Hotline at 1-800-424-9346 or TDD 1-800-553-7672 (hearing impaired) including directions on how to access electronically some of the documents and data referred to in this notice via EPA's Cleanup Information Bulletin Board System (CLU-IN). The CLU-IN modem access phone number is 301-589-8366 or Telnet to clu-in.epa.gov for Internet access. Callers within the Washington Metropolitan Area must dial 703-412-9810 or TDD 703-412-3323 (hearing impaired). The RCRA Hotline is open Monday-Friday, 9:00 a.m. to 6:00 p.m., Eastern Standard Time. For other information on this notice, contact Shiva Garg (5302W), Office of Solid Waste, 401 M Street, S.W., Washington, DC 20460, phone (703) 308-8459, e-mail: garg.shiva@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: On April 19, 1996, EPA proposed revised standards for hazardous waste combustors (i.e., incinerators and cement and lightweight aggregate kilns that burn hazardous waste). See 61 FR 17358. The Agency originally established a 60-day comment period, but later extended it to 120 days (61 FR 27038 (May 30, 1996)). The last date for receipt of comments on the Federal Register notice of April 19, 1996 continues to remain August 19, 1996.

The Agency is today providing notice and opportunity to comment on the following additional information pertaining to the proposed rule: (1) Reports from an independent peer review of technical aspects of the rule; (2) additional analyses of various fuel oils to be used to establish a specification to exclude comparable fuels; and (3) information on a synthesis gas process and product gas

specifications that was inadvertently not included in the docket.

Peer Review Reports

As part of the rule development process, the Agency initiated a peer review of the proposed rule, preamble and relevant supporting background documents in three subject areas of the rule: engineering, risk assessment and economic analysis. The review panel members were tasked with conducting a comprehensive and critical review of the proposed rule in their designated subject areas, addressing a set of questions pertaining to the technical basis of the approaches adopted by the Agency, and providing comments and/or recommendations where warranted. Each subject area panel prepared a summary report highlighting the key points of discussion, including the consensus reports or the dissenting opinions. Copies of the peer review panel report of each subject area and individual review comments of each panel member are available in the docket.

Comparable Fuel Specification

As part of the proposed comparable fuel specification, EPA used a benchmark approach to develop a series of technical specifications that would allow hazardous waste similar in composition to a commercially available fossil fuel to be excluded under RCRA when burned. One of these specifications included the Agency's proposal to limit the Appendix VIII, Part 261, constituents in comparable fuels¹ to those found in the benchmark fossil fuel. As discussed in the preamble of the proposal (61 FR 17461), EPA was unable to analyze for some compounds on the Appendix VIII list because either an analytical method was not available or could not be identified in time for initial analysis. Those compounds were not listed in the proposed specifications published on April 19, 1996.

EPA has subsequently been able to identify methods for analyzing some additional Appendix VIII compounds and is presenting a proposed specification level or detection limit for these compounds. These compounds are

listed in today's notice and also can be found, along with the analytical methods, in the Draft Technical Support Document for HWC MACT Standards, Addendum to Volume VI: Development of Comparable Fuels Specifications, August 1996. EPA invites comment on today's new individual specifications, as well as the composite specifications, and the analytical methods used in EPA's new analysis.

In addition, we want to clarify the rationale for proposing comparable fuel specification limits for total halogens and total nitrogen. Although neither total halogens nor total nitrogen are listed on Appendix VIII, Part 261 (or proposed for Appendix X), we believe that they should be limited to ensure that halogenated and nitrated products of incomplete combustion (PICs) from burning excluded waste would not be emitted at higher levels than from burning benchmark fossil fuel. Halogenated and nitrated organic compounds can pose a particular hazard to human health and the environment.

Synthesis Gas Comparable Fuel Exclusion

In discussing the exclusion of synthesis gas (syngas) fuel in the proposed rule, EPA referenced a Molten Metals Technology (MMT) letter that presented data on the MMT syngas process, including relevant specifications. See preamble discussion at 61 FR 17465. In placing the MMT information in the docket, an attachment to the letter containing the data was inadvertently not placed in the docket until late in the comment period. EPA has since received a request to extend the comment period pertaining only to the syngas exclusion to allow adequate time to review this attachment and provide comment on the syngas exclusion. In response to this request, EPA is granting 30 days from the publication date of this notice to comment on the proposed syngas fuel exclusion.

Appendix—Comparable Fuel Constituent and Physical Specifications

Note 1: All numbers in the tables of this appendix are expressed to two significant figures.

TABLE 1.—DETECTION AND DETECTION LIMIT VALUES FOR A POSSIBLE GASOLINE SPECIFICATION

Chemical name	Concentration limit (mg/kg at 10,000 Btu/lb)	Maximum detection limit (mg/kg)
1,1,1-Trichloroethane	Non-detect ...	34

¹ The specification would also include two metals that are identified in Clean Air Act section 112(b)

as hazardous air pollutants: cobalt and manganese. See 61 FR 17460.

TABLE 1.—DETECTION AND DETECTION LIMIT VALUES FOR A POSSIBLE GASOLINE SPECIFICATION—Continued

Chemical name	Concentration limit (mg/kg at 10,000 Btu/lb)	Maximum detection limit (mg/kg)
1,1,2-Trichloro-1,2,2-trifluoroethane	Non-detect	30
1,1-Dichloro-1-propene	Non-detect	30
1,1-Dichloroethane	Non-detect	34
1,2,3,4,6,7,8-Heptachlorodibenzo-p-dioxin	Non-detect	8.8

 BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No.96-167, RM-8843]

Radio Broadcasting Services; Powhatan, VA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by David Layne proposing the allotment of Channel 263A at Powhatan, Virginia, as the community's first local aural transmission service. Channel 263A can be allotted to Powhatan in compliance with the Commission's minimum distance separation requirements with a site restriction of 12.2 kilometers (7.6 miles) northwest in order to avoid short-spacing conflicts with the licensed sites of Station WSOJ(FM), Channel 262A, Petersburg, Virginia, and Station WCMS(FM), Channel 263B, Norfolk, Virginia. The coordinates for Channel 263A at Powhatan are 37-38-00 and 77-59-32.

DATES: Comments must be filed on or before September 3, 1996, and reply comments on or before October 15, 1996.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: David Layne, P.O. Box 110, Farmville, Virginia 23901 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418-2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rule Making*, MM Docket No.96-167, adopted August 2, 1996, and released August 9, 1996. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, Inc., (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

RIN 2137-AC86

Receipt of Petition for Rulemaking—Filling of Propane Cylinders

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: This notice solicits comments on the merits of a petition for rulemaking filed by the Barbecue Industry Association (BIA). BIA petitioned for a revision to 49 CFR 173.304(d) that would require registration and training of persons who fill propane cylinders, certification of filling equipment operators, and proof of financial responsibility.

DATES: Comments must be received by November 21, 1996.

ADDRESSES: Comments to this ANPRM should be addressed to the Dockets Unit (DHM-30), Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590-0001.

Comments may also be faxed to (202) 366-3753. Comments should identify the docket (HM-220C) and be submitted, if possible, in five copies. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed stamped post card showing the docket number. The Dockets Unit is located in Room 8421 of the Nassif Building, 400 Seventh Street, SW., Washington, DC 20590-0001. Public dockets may be reviewed between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.
