OFFICE OF
SOLID WASTE AND EMERGENCY RESPONSE
OSWER Directive 9272.0-5

MEMORANDUM

SUBJECT: Responsibilities for Federal Facilities
FROM: William N. Hedeman, Jr., Director
Office of Emergency & Remedial Response *Bill*
TO: Gene A. Lucero, Director
Office of Waste Programs Enforcement

The purpose of this memo is to provide a transition for the OERR Federal Facilities Program Manual development responsibilities that OWPE has assumed and to clarify responsibilities between our two offices for Federal facilities. As in the situation with other PRP's, OERR staff will continue to serve as contract for pre-remedial policy and implementation issues concerning Federal facilities.

Attached are all comments on the June 1985 draft Federal Facilities Program Manual received by my staff from EPA Regions and other Federal agencies. DOE is the only significant agency not included but they have promised comments by the end of August. Paul Beam will be available to you for review and comment assistance and he will coordinate OERR issues for Program Manual revisions. I want to thank your staff for their assistance during OERR's turn at the wheel. Debbie Wood and Linda Southerland were especially helpful with development of the draft Program Manual.

cc: Dr. Porter
