SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On June 21, 2006 (71 FR 35652), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under docket ID number EPA-HQ-OECA-2006-0439, which is available for public viewing online at <http://www.regulations.gov>, and in person viewing at the Enforcement and Compliance Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Avenue, NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket Center is (202) 566-1927.

Use EPA's electronic docket and comment system at <http://www.regulations.gov>, to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "docket search," then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov>, as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. Title: NSPS for the Phosphate Fertilizer Industry (Renewal).

ICR Numbers: EPA ICR Number 1061.10; OMB Control Number 2060-0037.

ICR Status: This is a request to renew an existing approved collection that is scheduled to expire on November 30, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or

sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The NSPS for the Phosphate Fertilizer Industry, published at 40 CFR part 60, subparts T, U, V, W, and X, were proposed on October 22, 1974, and promulgated on August 6, 1975. These standards apply to each wet-process phosphoric acid plant, each superphosphoric acid plant, each granular diammonium phosphate plant, and each triple superphosphate plant, having a design capacity of more than 15 tons of equivalent phosphorous pentoxide (P₂O₅) feed per calendar day. These standards also apply to granular triple superphosphate storage facilities.

Owners or operators of affected facilities described must make the following one-time-only initial notifications and reports on the results of the initial performance test. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. The owners or operators must install, calibrate, maintain, and operate a monitoring device which continuously measures and permanently records the total pressure drop across the scrubbing system.

Semiannual reports are required. The owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements. Responses to the collection of information are mandatory and are being collected to assure compliance with 40 CFR part 60, subparts T, U, V, W, and X. These notifications, reports and records are essential in determining compliance.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 46 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Phosphate Fertilizer Industry.

Estimated Number of Respondents: 13.

Frequency of Response: Initial and Semiannual.

Estimated Total Annual Hour Burden: 1,194 hours.

Estimated Total Annual Cost: \$388,363, which includes \$0 annual Start Up costs, \$320,190 annualized operations & maintenance (O&M) costs, and \$68,173 annualized labor costs.

Changes in the Estimates: There is no change of hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. It is determined that the number of respondents subject to the rules addressed by this ICR is 13, with no additional new sources expected over the three-year period of this ICR.

Dated: October 10, 2006.

Title: Federal Emissions Guidelines for Existing Municipal Solid Waste Landfills (Small) (Renewal).

ICR Numbers: EPA ICR Number 1893.04, OMB Control Number 2060-0430.

ICR Status: This ICR is scheduled to expire on November 30, 2006. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Environmental Protection Agency (EPA) is required

under section 111 of the Clean Air Act, as amended, to collect data. The information will be used by Agency enforcement personnel to (1) identify existing sources subject to these standards; (2) ensure that Best Demonstrated Technology is being properly applied; and (3) ensure that the emission control device is being properly operated and maintained on a continuous basis. In addition, records and reports are necessary to enable the EPA to identify landfills that may not be in compliance with these standards. Based on reported information, the EPA can decide which landfills should be inspected and what records or processes should be inspected at the landfill. The records that landfills maintain would indicate to the EPA whether the personnel are operating and maintaining control equipment properly. The type of data required is principally emissions data and would not be confidential. If any information is submitted to the EPA for which a claim of confidentiality is made, the information would be safeguarded according to the Agency policies set forth in 40 CFR, chapter 1, part 2, subpart B.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 72 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Solid Waste Landfills.

Estimated Number of Respondents: 173.

Frequency of Response: Annually.
Estimated Total Annual Hour Burden: 12,456.

Estimated Total Annual Cost: \$242,000 for operating and maintenance costs. There are no capital/startup costs associated with this ICR.

Changes in Estimates: There is an increase of 778 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR

Burdens. This adjustment is due to a mathematical error.

Dated: October 11, 2006.

Title: Information Collection Request for EPA's National Environmental Performance Track Program (Renewal).
ICR Numbers: EPA ICR No. 1949.05, OMB Control No. 2010-0032.

ICR Status: This ICR is scheduled to expire on October 31, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in

the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA's National Environmental Performance Track is a voluntary program that recognizes and rewards private and public facilities that demonstrate top environmental performance beyond current requirements. The program is based on the premise that government should complement existing programs with new tools and strategies that not only protect people and the environment, but also capture opportunities for reducing cost and spurring technological innovation.

Performance Track is a facility based program (not company-wide) that solicits and receives applications and makes acceptance decisions twice per year from February through April, and August through October. Applying facilities must meet four basic criteria: (1) A history of sustained compliance with environmental regulations; (2) an Environmental Management System (EMS) in place that has undergone an assessment by an independent third party; (3) past and future environmental achievements, and a commitment to quantified continuous environmental improvement; and (4) public involvement and annual reporting. Once accepted, members remain in the program for three years, as long as they continue to meet the program criteria. After three years, they may apply to renew their membership through a streamlined application process.

No confidential information is requested in this notice. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 16.4 hours per facility per year. This includes all applications, compliance screens, annual reporting, incentives participation, and site visits. EPA estimates that all facilities who voluntarily respond to this information collection by electing to participate in the Performance Track program have determined that the expected benefits of participation outweigh any burdens associated with preparing the response. Burden means the total time, effort, or financial resources expended by persons
