

mechanism of toxicity. Simazine shares a neuroendocrine mechanism of toxicity, which results in both reproductive and developmental consequences, with the structurally-related chlorinated triazine pesticides atrazine and propazine. Because these chlorinated triazine pesticides share a common mechanism of toxicity, the Agency evaluated the cumulative risk posed by this group while making final reregistration eligibility decisions on individual chlorinated triazines.

EPA has determined that the data base to support reregistration is substantially complete and that products containing simazine are eligible for reregistration provided the risks are mitigated either in the manner described in the RED or by another means that achieves equivalent risk reduction. Upon submission of any required product specific data under section 4(g)(2)(B) and any necessary changes to the registration and labeling (either to address concerns identified in the RED or as a result of product specific data), EPA will make a final reregistration decision under section 4(g)(2)(C) for products containing simazine.

EPA must review tolerances and tolerance exemptions that were in effect when the Food Quality Protection Act (FQPA) was enacted in August 1996, to ensure that these existing pesticide residue limits for food and feed commodities meet the safety standard established by the new law. Tolerances are considered reassessed once the safety finding has been made or a revocation occurs. EPA has reviewed and made the requisite safety finding for the simazine tolerances included in this notice.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** of May 14, 2004, (69 FR 26819)(FRL-7357-9) explains that in conducting these programs, EPA is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. Due to its refined risk assessment and the relatively limited risk management issues associated with this pesticide, simazine was reviewed through the modified four-phase process. Through this process, EPA worked extensively with stakeholders and the public to reach the regulatory decisions for simazine.

The reregistration program is being conducted under Congressionally

mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. The Agency is issuing the simazine RED for public comment. This comment period is intended to provide an additional opportunity for public input and a mechanism for initiating any necessary amendments to the RED. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Docket for simazine. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

The Agency will carefully consider all comments received by the closing date and will provide a Response to Comments Memorandum in the Docket and regulations.gov. If any comment significantly affects the document, EPA will also publish an amendment to the RED in the **Federal Register**. In the absence of substantive comments requiring changes, the simazine RED will be implemented as it is now presented.

#### *B. What is the Agency's Authority for Taking this Action?*

Section 4(g)(2)(A) of FIFRA, as amended, requires the Administrator to make "a determination as to the eligibility for reregistration (i) for all active ingredients subject to reregistration under this section for which tolerances or exemptions from tolerances are required under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), not later than the last date for tolerance reassessment established under section 408(q)(1)(C) of that Act (21 U.S.C. 346a(q)(1)(C)) . . . ."

Section 408(q) of the FFDCA, 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA. This review is to be completed by August 3, 2006. A tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2), respectively, if "the Administrator determines [the pesticide chemical residue] is safe", i.e., "that there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." 21 U.S.C. 346a(b)(2)(A), (c)(2)(A). In making this safety finding, FFDCA requires the Administrator to consider, among other factors,

"available information concerning the cumulative effects of such residues and other substances that have a common mechanism of toxicity . . . ." 21 U.S.C. 346a(b)(2)(D)(v), (c)(2)(B).

## II. What Action is the Agency Taking?

EPA is printing a summary of a pesticide petition received under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or amendment of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that this pesticide petition contains data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petition. Additional data may be needed before EPA rules on this pesticide petition.

Pursuant to 40 CFR 180.7(f), a summary of the petition included in this notice, prepared by the petitioner along with a description of the analytical method available for the detection and measurement of the pesticide chemical residues is available on EPA's Electronic Docket at <http://www.regulations.gov>. To locate this information on the home page of EPA's Electronic Docket, select "Quick Search" and type the OPP docket ID number. Once the search has located the docket, clicking on the "Docket ID" will bring up a list of all documents in the docket for the pesticide including the petition summary.

### New Tolerance

**PP 5F7018.** Syngenta Crop Protection, P.O. Box 18300, Greensboro, NC 27409, proposes to establish a regional tolerance (East of the Mississippi River) for residues of the fungicide mefenoxam in or on food commodities bean, succulent shelled at 0.03 parts per million (ppm); and a national tolerance in or on food commodities turnip, greens at 5.0 ppm. Syngenta has submitted a practical analytical method involving extraction, filtration, acid reflux, steam distillation, and solid phase clean-up with analysis by

confirmatory gas chromatography using nitrogen/phosphorous detection. A total residue method is used for determination of the combined residues of mefenoxam and its metabolites which contain the 2,6-dimethylaniline (DMA) moiety. The limit of quantitation (LOQ) for the method is 0.05 ppm.
