Background: The Advisory Council on Clean Air Compliance Analysis (Council) is a Federal advisory committee chartered under the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C., App. The Council is charged with providing advice, information and recommendations to the Agency on the economic issues associated with programs implemented under the Clean Air Act and its Amendments. Pursuant to a requirement under section 812 of the 1990 Clean Air Act Amendments, EPA conducts periodic studies to assess the benefits and the costs of the Clean Air Act. The Council has been the chief reviewing body for these studies and has issued advice on a retrospective study issued in 1997, a prospective study issued in 1999, and, since 2001, analytic blueprints for a second prospective study on the costs and benefits of clean air programs covering the years 1990-2020. EPA's Office of Air and Radiation (OAR) is proceeding to implement past advice offered by the Council on its forthcoming "Second Prospective Analysis." OAR's Web site on these section 812 studies may be found at <http://www.epa.gov/oar/sect812/>.

The purpose of the meeting is for OAR to provide a status update on the ongoing 812 study ("Benefits and Costs of the CAA-1990-2020") and for the Council to provide advice on the direct cost and the uncertainty modeling components of the study. Council members will discuss whether any additional advisory activities are needed prior to OAR's issuance of a final report. SUPPLEMENTARY INFORMATION: Notice is hereby given that a petition has been received from the state of Connecticut requesting a determination by the Regional Administrator, U.S. Environmental Protection Agency, pursuant to Section 312(f)(3) of Public Law 92–500 as amended by Public Law 95–217 and Public Law 100–4, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available along coastlines and coastal tidal rivers within the following boundaries:

Waterbody/General Area	Latitude	Longitude
From Byram Point at the western border of Greenwich	40°59'03.15" N	73°39'24.55" W
Southeast following the boundary between CT & NY to a point in LIS	40°57'03.23" N	73°36'46.42" W
Easterly following the boundary between CT & NY to a point due south of Hoadley Point at the eastern border of Branford	41°07'51.17" N	72°44'09.73" W
Due north to Hoadley Point at the eastern border of Branford	41°15'22.88" N	72°44'09.73" W

The proposed area also includes the navigable reaches of all Connecticut rivers and tidal streams that drain into Long Island Sound within its bounds, including the Housatonic River from the Derby Dam and the Quinnipiac River from the southern border of North Haven.

Connecticut has certified that there are 43 pumpout facilities within the proposed area available to the boating public. A list of the facilities, phone numbers, locations, and hours of operation is appended at the end of this petition.

Connecticut has provided documentation indicating that the total vessel population is estimated to be 12,000 in the proposed area. It is estimated that 5,000 of the total vessel

population may have a Marine Sanitation Device (MSD) of some type. These total numbers may be overestimated by the state of Connecticut, which would give the boating public a larger ratio of pumpouts to boats (300–600 vessels for everyone facility). The majority of facilities are connected directly into the local wastewater treatment system.

The Wheeler State Wildlife Management Area and units of the McKinney National Wildlife Management Area are within or border the proposed No Discharge Area (NDA). There are approximately 107 marinas, 15 public boat ramps, 29 public and numerous private beaches located within the proposed No Discharge Area.

Both recreational and commercial shell fishermen use the area. There are thousands of acres of productive shellfish beds in the proposed NDA supporting oysters, hard shell clams, soft shell clams, and razor clams. The area supports a thriving commercial and recreational fishing fleet. Species of commercial and recreational interest include striped bass, bluefish, blackfish, summer flounder, and winter flounder. The proposed area has a variety of rich natural habitats, and supports a wide diversity of species. The federally listed species include the bald eagle, shortnose sturgeon, piping plover, and puritan tiger beetle as well as dozens of state designated rare and endangered species.
