

BASE Buildings Pollutant Sources: Pesticide Application Practices - Period of Last Exterior and Interior Pesticide Applications Preceding BASE Study Sampling Week

Pesticide Application Practices, Days Since Application Before Study Week	Number of Buildings Reporting	
	Exterior Pesticide Application ¹	Interior Pesticide Application ²
0-10	12	13
11-25	8	23
26-50	8	16
51-100	8	8
101-200	9	6
201-500	11	2
501-1,000	1	3
>1,000	1	1
Total Number of Buildings Reporting	58	72

Notes:

¹Number of buildings based on those buildings reporting a date for last exterior pesticide application (n=58). Note that some buildings reported no exterior pesticide application, and some buildings reporting exterior pesticide application may not have indicated specific dates of the last application.

²Number of buildings based on those buildings reporting a date for last interior pesticide application (n=72). Note that some buildings reported no interior pesticide application, and some buildings reporting interior pesticide application may not have indicated specific dates of the last application.

Variable Descriptions:

Exterior Pesticide Application lists the number of days prior to the building study that exterior pesticides were applied.

Interior Pesticide Application lists the number of days prior to the building study that interior pesticides were applied.
