

Save the Date!

On June 24 and 25, 2003, the U.S. Environmental Protection Agency (EPA) will hold a meeting to provide stakeholders with an opportunity to discuss **EPA's 2003 Report to Congress on the Impacts and Control of Combined Sewer Overflows (CSOs) and Sanitary Sewer Overflows (SSOs)**. This report, due in December 2003, will investigate environmental and human health impacts of CSOs and SSOs, resources spent by municipalities to control these impacts, and technologies for controlling these impacts.

EPA's Office of Water invites members of the regulated community, public health officials, representatives of environmental groups, and the general public to comment on preliminary findings of the 2003 report and to discuss the report's implications for national policy. EPA will present the results of the data collection, request verification of information and data sources, and solicit input on findings and interpretations. A detailed agenda will follow closer to the meeting date.

If you have any questions regarding the report or the meeting, please contact Kevin DeBell in EPA's Office of Wastewater Management (debell.kevin@epa.gov; 202-564-0040).

Meeting Details

When: June 24 and 25, 2003

Where: The Renaissance Hotel
999 9th Street NW
Washington, D.C.

Registration: For planning purposes, please register by e-mailing 2003RtCStakeholders@sra.com before June 10, 2003. In the e-mail, please include the correct spelling of your first and last names and your affiliation or organization.
