

Population for Storm Water Entities as Defined by the 2000 Census

Kansas

This document contains calculations for populations within an Urbanized Areas (UA) as designated by the US Census Bureau for the state of Kansas. Population is calculated for each portion of either an incorporated place, minor civil division, or a county within an UA and is based on the population values provided by the 2000 US Census Tiger data. In addition, a table is included that provides a list of places that have a population greater than 10,000 people and a population density of 1,000 people per square mile that are not located in an UA. This data was obtained from the US Census website.

Urbanized Area Populations

It should be noted that the Incorporated Places and the Minor Civil Divisions tables should not be used together. The tables cover the same areas divided into two different political entities. If the tables are used together it is possible that double counting of populations will occur.

Incorporated Places Table

The table below provides a guide for the UA table headings.

* The population calculation for this area provides the population within the UA that is not located within an incorporated place. An incorporated place is created to provide governmental functions for a concentration of people. For example, a city or municipality is an example of an incorporated place.

** The population recorded here is for an incorporated place that can be located within multiple counties. To calculate the total population within the incorporated place add all values associated with it together. For example, the population of Mulvane is 4,154 + 965 = 5,119.

** The population recorded here is for a MCD that can be located within multiple counties.
To calculate the total population within the UA associated with the MCD add all values together.
For example, the population of Lake Quivira is 883 + 49 = 932.

Outside Urbanized Area Populations

As mentioned above, the places in the following table all have a population greater than 10,000 people and a population density of 1,000 people per square mile.
