

**U.S. Environmental Protection Agency**  
**Scrap Tire Aggregate Civil Engineering Uses DVD Requirements**  
**Statement of Work**

This Statement of Work provides requirements for the contractor to produce an informational DVD on civil engineering applications of recycled scrap tires.

**The Government will provide:**

The EPA and its partners (Illinois EPA and the Center for Integrated Waste Management) will provide a script and a list of experts to be interviewed.

**Contractor will provide:**

Materials and labor necessary to produce and videotape interviews with experts on the application of scrap tire aggregate in civil engineering projects. The contractor shall film, edit, and produce a professional quality DVD that includes an overview section for the casual layman as well as a more in depth look at the engineering aspects suitable for those with a technical interest. The contractor shall produce, label and deliver 200 DVDs to be distributed among EPA and its partners (Illinois EPA and the Center for Integrated Waste Management).

Depending on timing of field applications of civil engineering projects, the contractor may be asked to videotape the installations of scrap tire aggregate in the field.

**Required Delivery Dates**

The delivery date shall be no more than five (5) months from contract award.

Final product shall be delivered by courier to the Project Officer.
