

## *Options for Implementation Mechanisms*

Guiding Principles/Goals

- Fair to the regulated community
- Minimize burden on OPP and stakeholders

Search for balance: maximize goals of equity and efficiency/cost-effectiveness

Possible pilot?

1

## *Option 1*

Separate approval process, possibly staggering submission dates

*Pro:* uniformity in timing of label changes

*Con:* potentially substantial new commitment of resources and new workload

2

## *Option 2*

"Routine business" model, incorporating GHS changes into regular cycles of label review and revision for other purposes

*Pro:* Minimizes disruption and additional costs, since label is already being revised and reviewed

*Con:* Perceived disparities in timing of changes for like products (uneven playing field)
