Overview

Dr. Bergman serves as Principal Investigator on archaeological projects, and is a specialist in lithic analysis. His duties include designing and implementing field surveys, coordinating with state and federal agencies, preparing reports, and overseeing laboratory analysis. He is responsible for assessing the significance of cultural resources found during cultural resource studies and for making recommendations on National Register eligibility status. In addition to the many cultural resource projects he has completed, he has directed Data Recovery excavations at major prehistoric sites in both the Midwest and Northeast.

In 1995, Dr. Bergman was a co-recipient with the FERC of Pennsylvania's first Annual Historic Preservation Archaeological Award for Outstanding Achievement upon completion of Transcontinental Gas Pipe Line Corporation's Sandts Eddy Archaeological Project. In 1997, the Sandts Eddy project was one of four projects nationwide selected for inclusion in the Secretary of Interior's Annual Report to the U.S. Congress as an outstanding contribution to research in the Federal Archaeology Program. In 1999, Dr. Bergman received a second citation in the Secretary of the Interior's Annual Report to U.S. Congress for his work on the 18th and 19th century Susan Furnace site in Cherokee County, South Carolina.
