

Allison Park Industrial Complex

(Anvil Products)

**3812 William Flynn Highway
Allison Park, PA 15101
Congressional District 14
EPA ID #: PAD004336822
Last Updated: 12/22/2008**

Current Progress at the Site

An Environmental Indicator (EI) inspection was conducted at the former Anvil Products facility in July 2003 to determine whether human exposures to contamination and migration of contaminated groundwater are under control. Based on this investigation, it is unlikely that Anvil's past hazardous waste handling practices currently impact human health and the environment; however, more information will be needed in order to confirm that both EIs are under control.

Site Description

The former Anvil facility is currently owned by Haber Associates, who purchased the site, now known as Allison Park Industrial Complex, in 1988 and leases its buildings to several tenants that generate no hazardous wastes. The 7-acre site is located in Allison Park, Hampton Township, Pennsylvania. Anvil purchased the site in 1928 and manufactured threaded steel pipe couplings for the oil and gas industry from 1930 to 1985 and bomb plugs during World War II. The main buildings located on the site are Anvil's former plating plant (adjacent to road), wastewater treatment plant (middle building), and warehouse and machine shop processing area (adjacent to Pine Creek).

Site Responsibility

To be determined.

Institutional Controls

To be determined.
