

# Boehringer Ingelheim Chemicals, Inc.

2820 N Normandy Dr  
Petersburg, VA 23805  
Congressional District 4  
EPA ID #: VAD093561652  
Last Updated: 12/01/2008

## Current Progress at the Site

---

The BICI Facility completed investigations of two land based units (the Old Land Treatment Area and the Liquid Waste Disposal Area) consistent with the requirements of a Corrective Action Permit that was issued and effective from February 16, 1986 to February 15, 1996. In a letter dated December 26, 1990, EPA determined that based on a review of the sampling results that no additional sampling or corrective action is warranted. Subsequent to the evaluations, a release from the facility sewers was identified and reported by the Facility. In a letter dated February 21, 2007, the Facility voluntarily agreed to participate in EPA's Facility Lead Program to evaluate site conditions that may warrant corrective action.

BI submitted a Facility Lead Program Workplan to EPA in May 2007. EPA provided comments on the Workplan in March 2008. In July 2008, BI submitted a response to the comments along with draft evaluations of the environmental indicators and a Conceptual Site Model Report. EPA is reviewing the submittal.

## Site Description

---

The BICI Facility, formerly known as Infracorp, Ltd. and Lee Laboratories, Inc. (before January 1993), is located on approximately 200 acres in a largely undeveloped and forested area south of Richmond with mixed residential and industrial use. The property is approximately 20 percent developed and contains several production/manufacturing buildings, process buildings, storage buildings, asphalt parking lots and roadways, and landscaped areas. The buildings were constructed between the 1980s and 2000s. Pharmaceutical ingredients and intermediates are manufactured at the plant. The facility is responsible for corrective action as a result of operation of a former hazardous waste storage unit that was closed with the approval of VADEQ in 1998.

Numerous hazardous chemicals, non-hazardous chemicals, and petroleum products are used in the manufacturing process. The raw chemicals and petroleum products are stored in large aboveground storage tanks (ASTs), 55-gallon drums, and carboys. The facility is a large-quantity generator of hazardous waste. The hazardous and non-hazardous wastes generated at the facility are stored in above ground storage tanks, tanker trucks, 55-gallon drums, carboys, and small containers pending disposal/treatment.

## Site Responsibility

---

---

RCRA Corrective Action activities at this facility are being conducted under the direction of EPA Region 3 in coordination with VADEQ.

## Institutional Controls

---

---

The need for institutional controls has not been determined.

## Government Contact

---

---

EPA Project Manager:

Ms. Diane Schott - 3LC20  
U.S. Environmental Protection Agency - Region III  
1650 Arch Street  
Philadelphia, PA 19103-2029  
Phone: (215) 814-3430  
Email: [schott.diane@epa.gov](mailto:schott.diane@epa.gov)

VA DEQ Contact:

Mr. Richard Criqui  
Hazardous Waste Corrective Action Coordinator  
Office of Hazardous Waste Permitting.  
Virginia Department of Environmental Quality  
P.O. Box 1105  
Richmond, VA 23218  
Phone: (804) 698-4013  
Email: [rjcriqui@deq.virginia.gov](mailto:rjcriqui@deq.virginia.gov)
