

Region 3 GPRA Baseline RCRA Corrective Action Facility

Beazer East-Colliers (Formerly: Beazer, Koppers-Colliers)

**RD 1 Crosscreek District
Colliers, WV 26035
Congressional District 1
EPA ID #: WVD980707178
Last Updated: 12/30/2008**

Current Progress at the Site

This facility is one of EPA Region III's high priority RCRA corrective action sites. The approximately ten acre inactive landfill was used to landfill coal-tar byproduct and activated wastewater treatment sludge from Kopper's nearby Follansbee, West Virginia plant. On March 22, 2000 EPA determined that both the Human Exposures and Groundwater Environmental Indicators have been met. EPA and WVDEP evaluated the site and determined that all of the corrective action requirements have been met. In November of 2005, WVDEP reissued Colliers a Post Closure Permit that included a No Further Corrective Action with Monitoring determination as part of the permit. The facility is still required to perform annual groundwater compliance monitoring.

Site Responsibility

RCRA Corrective Action activities at this facility are being conducted under the direction of the WVDEP.

Institutional Controls

No institutional controls are currently in place.
