COMMONLY ASKED QUESTIONS FROM PESTICIDE PRODUCING ESTABLISHMENTS REGARDING FIFRA SECTION 7

1. Q. What is a Company number?
 - A. A company number is a unique number assigned by the United States Environmental Protection Agency (U.S. EPA), to an individual or company who submits an application to register a pesticide product, an application for supplemental registration of a registered pesticide, or to register a pesticide producing establishment under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). This number is up to 6 digits long. (Example: **987654**)

2. Q. What is an Establishment number?
 - A. An establishment number is a unique number assigned by the U.S. EPA, to a site where a pesticide product, active ingredient, or device is produced, after the Agency has reviewed and accepted a completed application to register a pesticide producing establishment. The establishment registration number is a unique registration number assigned to each and every site that has registered to produce pesticides. The establishment registration number consists of the company number, state abbreviation, and serial number. (Example: **987654-IL-001** is the establishment registration number assigned to the first site, located in the State of Illinois, registered by the company assigned the company number 987654. **987654-OH-003** is the third site owned and operated by the company in Ohio.)
