III. ACTIONS TAKEN

At approximately 2100 hours on 04 June 2004 Glynn County Fire Department (GCFD) responded to 911 notification of discharged diesel fuel discovered in the parking lot of the Ramada Inn at the intersection of I-95 and GA 25 north of Brunswick, GA. The fuel was leaking from a saddle tank of a tractor trailer parked on the Ramada property. GCFD immediately diked the discharged fuel to prevent it from entering the storm drain drop inlet located less than 50 feet from the source. GCFD also deployed a catch pan to minimize the migration of additional discharged fuel.

EPA ERRS contractor WRS mitigated the discharge by plugging the tank and pumping off the remaining fuel. WRS then applied absorbents to the discharged oil and collected the saturated absorbents into a 55 gallon drum.

IV. FUTURE ACTIONS

Disposal of used absorbents.

V. COSTS TO DATE

EPA	\$ 300
ERRS (WRS)	<u>\$ 500</u>
