

## FORMER ROCKWELL INTERNATIONAL CORPORATION ALLEGAN, MICHIGAN

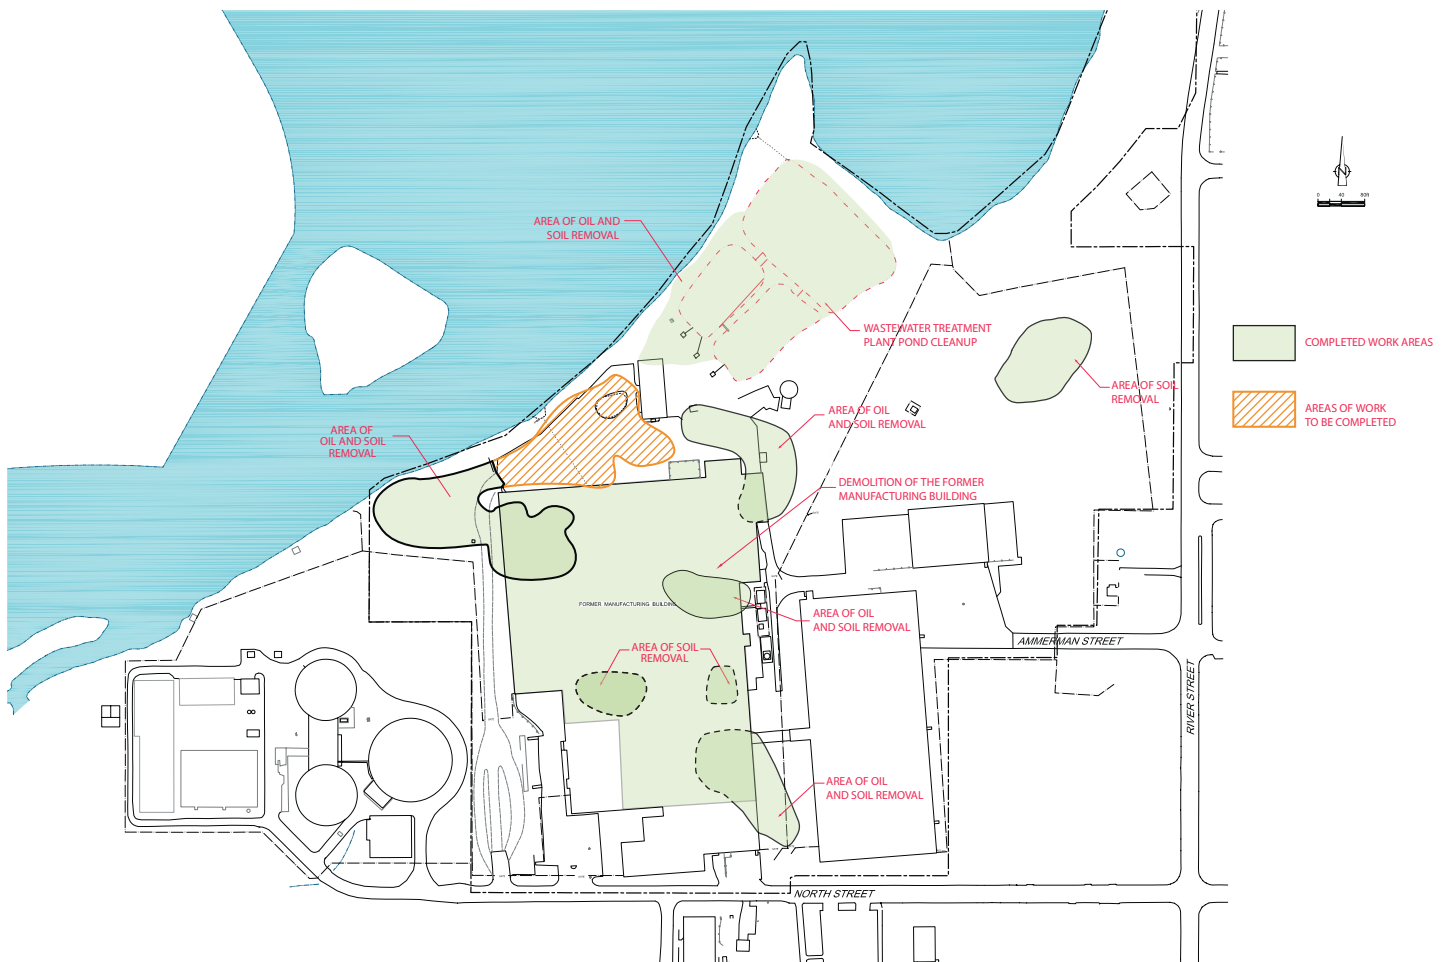

This Remedial Action Progress Update has been prepared to provide local residents with an update of the progress of the Remedial Action at the Former Rockwell International Corporation Site (the Site). Please see the Project Fact Sheet for more information on the Remedial Action.

The following activities were conducted in June 2006:

- Continued removal and appropriate off-site disposal of all soils and sediments at depths up to two feet below ground surface to meet Michigan Residential Criteria;
- Removal and appropriate off-site disposal of all soils at depths greater than two feet below ground surface to meet Michigan Industrial criteria;
- Continued removal and appropriate off-site disposal of all oil-impacted soils; and
- Begin final grading and restoration at Site.

The following activities are planned to begin in July 2006:

- Continue removal and appropriate off-site disposal of all soils and sediments at depths up to two feet below ground surface to meet Michigan Residential Criteria;
- Removal and appropriate off-site disposal of all soils at depths greater than two feet below ground surface to meet Michigan Industrial criteria;
- Continue final grading and restoration of site;
- Continue removal and appropriate off-site disposal of all oil-impacted soils; and
- Remedial Action anticipated to be completed in August 2006.
