Chicago, IL

Re: **Additional Information Request for Environmental Geo-Technologies, LLC (EGT) Wells 1-12 and 2-12, United States Environmental Protection Agency Underground Injection Control (UIC) Permit Applications #MI-163-1W-C010 and -C011**

Dear Ms. Harvey:

Thank you for your letter of June 2, 2008. Attached to this cover letter is the EGT information that responds to each of the 11 items for which you had requested clarification.

The first eight (8) items were information basically requesting subsurface information which has been principally prepared by Petrotek Engineering.

For the ninth item we have provided a list of the expected "other statutes" permits.

For the tenth item we have provided a comprehensive list of all of the potential SIC codes applicable to the facility, however, SIC 4953 is the "primary SIC" code. We have also explained the apparent discrepancy for the LoC.

For the eleventh item, we have provided a revised WAP for your and your colleagues consideration.

We trust that this appended information is sufficient for your needs, however, if you or Ms. Dana Rzeznik have any questions or require further clarification, please contact us at your convenience.

Sincerely,

  
Yaser Mahmoud
