

regarding the approval of this plan revision is based on its meeting the requirements of section 110 of the Clean Air Act and 40 CFR Part 51.

EPA is approving this SIP revision request without prior proposal because it is viewed as noncontroversial and no adverse comments are anticipated. The public should be advised that this action will be effective 60 days from the date of this Federal Register notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and the other will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. (See 46 FR 44476 dated September 4, 1981 and 47 FR 27073 dated June 23, 1983).

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit within 60 days of today. This action may not be challenged later in proceedings to enforce its requirements (See 307(b)(2).).

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This technical amendment makes a grammatical clarification to § 413.01(c) and § 433.10(c) and corrects errors in the lists of regulated toxic organic pollutants in § 413.02 and § 433.11.

EFFECTIVE DATE: November 7, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Ernst P. Hall, Chief, Metals Industry Branch, (202) 382-7126.

SUPPLEMENTARY INFORMATION: On July 15, 1983 (48 FR 32462), EPA promulgated 40 CFR Part 433 and final amendments to 40 CFR Part 413. EPA published a correction notice related to these parts on September 26, 1983 (48 FR 43680). However, since that date the Agency has detected additional errors which the Agency is correcting in today's notice.

In §§ 413.01(c) and 433.10(c) the Agency exempted metallic platemaking and gravure cylinder preparation "conducted within printing and publishing facilities." The Agency has been informed that this exclusionary language has been restrictively interpreted to mean that only metallic platemaking and gravure cylinder preparation operations physically conducted within a printing and publishing facility would be excluded

(i) Incorporated by reference:

(A) Part 217, "Emissions from Motor Vehicles Propelled by Gasoline Engines," effective January 29, 1986

3. Section 52.1679 is amended by adding on an entry in numerical order for Part 217 in the table as follows:

from regulation under Parts 413 and 433. This was never the Agency's intent.

As is demonstrated by the discussion in the original electroplating preamble (44 FR 52591, September 7, 1979), the Agency intended to exclude all printing and publishing industry operations from regulation under Part 413. The Agency identified the industry by reference to SIC Code 2700. In the 1982 Standard Industrial Classification Manual, Major group 27—Printing, Publishing, and Allied Industries, includes "establishments engaged in printing by one or more of the common processes, . . . ; and those establishments which perform services for the printing trade . . ." For example, a shop that manufactures and sells metallic plates to a printing and publishing facility would be included within the SIC Code 2700 group. The Agency, in developing the electroplating and metal finishing pretreatment standards, did not specifically study or cost treatment technologies for any metallic platemaking or gravure cylinder preparation conducted either within or "for" the printing and publishing industry. Therefore, the administrative records for those rulemakings support today's correction notice clarifying that the exclusionary language in §§ 413.01(c) and 433.10(c) also applies to facilities that perform metallic platemaking or gravure cylinder preparation "for," as well as within, the printing and publishing industry.

Today's correction notice adds the words "or for" after the word "within" in the applicable exclusionary provisions in §§ 413.01(c) and 433.10(c). This clarifies that facilities engaged in metallic platemaking and gravure cylinder preparation for printing and publishing, either within their facility or for an outside printing or publishing facility, are not subject to the

electroplating and metal finishing pretreatment standards.

The other corrections addressed in this notice relate to the listing of toxic organic pollutants in the definition of the term "TTO" in §§ 413.02(i) and 433.11(e). This notice adds the chemical "1,3-dichloropropylene (1,3-dichloropropene)" to both lists as it was inadvertently omitted. In addition, the notice corrects the listing of "1,2-dichloropropane (1,3-dichloropropene)" by deleting "(1,3-dichloropropene)".

The Agency is making these corrections effective upon publication in the Federal Register. The Agency's action makes only minor corrections and therefore the Agency does not believe that public notice and opportunity to comment is necessary.
