MEMORANDUM

SUBJECT: Amendments to the U.S. Environmental Protection Agency’s Civil Penalty Policies to Account for Inflation (Effective December 6, 2013)

FROM: Cynthia Giles
Assistant Administrator

TO: Regional Administrators
Deputy Regional Administrators

The purpose of this memorandum is to amend the EPA’s existing civil penalty policies to account for inflation. Specifically, with the exception of penalties assessed under expedited settlement agreement (ESA) programs, this memorandum amends all existing penalty policies to increase the initial gravity-based penalties by 4.87 percent for violations that occur after December 6, 2013, the effective date of the 2013 Civil Monetary Penalty Inflation Adjustment Rule (2013 Penalty Inflation Rule or Rule). The 4.87 percent represents the cost-of-living adjustment, calculated pursuant to the formula prescribed in Section 5(b) of the Debt Collection Improvement Act (DCIA),¹ which was applied in developing the 2013 Rule.

This memorandum also provides guidance on pleading civil penalties for violations that occur before and after the effective date of the Rule, and when to apply the new maximum civil penalty amounts that may be sought in certain administrative enforcement actions brought under the Clean Water Act (CWA), Certain Alaskan Cruise Ship Operations Act (CACSOA), Safe Drinking Water Act (SDWA), Clean Air Act (CAA), the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and the Emergency Planning and Community Right-to-Know Act (EPCRA).

I. Background

The DCIA requires each federal agency to issue regulations adjusting for inflation the statutory civil penalties that can be imposed under the laws administered by that agency. On November 6, 2013, the EPA promulgated the 2013 Penalty Inflation Rule pursuant to Section 4 of the DCIA; the Rule is effective December 6, 2013. (A copy of the Rule, as published at 78 Fed. Reg. 66643-48 (Nov. 6, 2013), is attached.) Under the Rule, only 20 out of 88 statutory penalty amounts are being increased for two reasons: (1) since 2008, when the last Penalty Inflation Adjustment Rule was promulgated, the rate of inflation has been low, resulting in a cost-of-living adjustment of only 4.87 percent for those penalties

that were last adjusted in 2008; and (2) when the DCIA’s mandatory rounding rules were applied to the inflation adjusted increment, the inflation adjusted amounts were, in most cases, insufficient to warrant an increase under the 2013 Rule. All violations occurring after December 6, 2013, the effective date of the Rule, are subject to the new, inflation-adjusted, statutory penalties.  

II. The DCIA’s Formula for Calculating Cost-of-Living Adjustments to Civil Penalties

Pursuant to the DCIA, each federal agency is required to issue regulations adjusting for inflation all statutory civil monetary penalties that can be imposed pursuant to such agency’s statutes. The purpose of these inflation adjustments is to maintain the deterrent effect of civil penalties, thereby promoting compliance with the law. Section 5 of the DCIA requires each agency to apply a specific formula and statutorily prescribed rounding rules to determine whether and to what extent statutory civil penalties should be increased to account for any changes in the cost-of-living. Under the DCIA, the cost-of-living adjustment (COLA) is determined by calculating the percentage increase, if any, by which the Consumer Price Index for all-urban consumers (CPI-U) for the month of June of the calendar year preceding the current adjustment exceeds the CPI-U for the month of June of the calendar year in which the amount of such civil monetary penalty was last set or adjusted. Accordingly, the COLA applied under the 2013 Rule equals the percentage by which the CPI-U for June 2012 (i.e., June of the year preceding 2013, the year the Rule was published), exceeds the CPI-U for June of the year in which the amount of a specific penalty was last adjusted (i.e., 2008, 2004 or 1996, as the case may be).

III. Amendments to the EPA’s Civil Penalty Policies

By this memorandum, the Office of Enforcement and Compliance Assurance (OECA) is amending the EPA’s existing civil penalty policies to increase the initial gravity component of the penalty calculation by 4.87 percent for those violations subject to the new Rule, i.e., violations occurring after December 6, 2013. As further discussed below, this memorandum does not increase penalty amounts that may be assessed under any of the EPA’s ESA programs.

While not required specifically by the Act, we believe revising our civil penalty policies to account for inflation is consistent with the Congressional intent in passing the DCIA and is necessary to implement effectively the mandated penalty increases set forth in 40 C.F.R. Part 19. In addition, this is consistent with the practice we have been implementing since 1997, when we first amended the EPA’s civil penalty policies to reflect the COLA applied under the 1996 Civil Monetary Penalty Inflation Adjustment Rule. Accordingly, each non-ESA civil penalty policy is now modified to apply the appropriate guidelines set forth below. These new guidelines apply to civil penalty policies, regardless of whether the policy is used for determining a specific amount to plead in a complaint or for determining a bottom-line settlement amount.

---

2 Section 6 of the DCIA provides that “[a]ny increase under this Act in a civil monetary penalty shall apply only to violations that occur after the date the increase takes effect.” [Emphasis added.]
A complete list of all of the EPA’s non-ESA penalty policies is provided at the end of this memorandum. Subsequent to the issuance of this memorandum, the division directors in the Office of Civil Enforcement and the Office of Site Remediation Enforcement may issue revised penalty matrices under program-specific penalty policies to reflect the following guidelines, as summarized in the chart at pages 5-6.

A. If all of the violations in a particular case occurred on or before the effective date of the 2013 Rule, penalty policy calculations should be consistent with the 2008 Memorandum.

B. For those judicial and administrative cases in which some or all of the violations occurred after the effective date of the 2013 Rule, the penalty policy calculations are modified by following these three steps:

1. Perform the economic benefit calculation for the entire period of the violation. Do not apply any mitigation for ability to pay or litigation considerations at this point.

2. Apply the gravity component of the penalty policy in the standard way for all violations according to the provisions of subparagraph 3 below. Do not apply any mitigation or adjustment factors at this point.

3.(a) **For those penalty policies that were issued prior to January 31, 1997:** Calculate the gravity component according to the penalty policy. For violations that occurred after January 30, 1997 through March 15, 2004, multiply the gravity component by 1.1, reflecting the 10% first-time adjustment. For violations that occurred after March 15, 2004 through January 12, 2009, multiply the gravity component by 1.2895, reflecting both the 10% first-time adjustment and the 17.23% COLA [1.10 x 1.1723 x 1.0983 = 1.2895]. For violations that occur after January 12, 2009 through December 6, 2013, multiply the gravity component by 1.4163, reflecting the 10% first-time adjustment, the 17.23% and the 9.83% COLAs [1.10 x 1.1723 x 1.0983 x 1.0487 = 1.4853].

   Assume, for example, that under the applicable penalty policy, the initial gravity-based penalty is $1,000 for each day of violation. If the violations occurred for a total of 10 days during the period after January 30, 1997 through March 15, 2004, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.1 = $11,000. If the violations occurred for 10 days during the period after March 15, 2004 through January 12, 2009, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.2895 = $12,895. If 10 days of the violations occurred after January 12, 2009 through December 6, 2013, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.4163 = $14,163. If 10 days of the violations occurred after December 6, 2013, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.4853 = $14,853.
(b) **For those penalty policies that were issued or revised after January 30, 1997, through March 15, 2004:** Calculate the gravity component according to the penalty policy. For violations that occurred after January 30, 1997 through March 15, 2004, use the gravity component set forth in the penalty policy, as the 10% first-time adjustment is reflected in those policies. For violations that occurred after March 15, 2004 through January 12, 2009, multiply the gravity component by 1.1723, reflecting the 17.23% COLA. For violations occurring after January 12, 2009 through December 6, 2013, multiply the gravity component by 1.2875, reflecting both the 17.23% and the 9.83% COLAs [1.1723 x 1.0983 = 1.2875]. For violations that occur after December 6, 2013, multiply the gravity component by 1.3502, reflecting the 17.23% COLA, the 9.83% and the 4.87% COLAs [1.1723 x 1.0983 x 1.0487 = 1.3502].

Assume, for example, that under the applicable penalty policy, the initial gravity-based penalty is $1,000 for each day of violation. If the violations occurred for 10 days during the period after March 15, 2004 through January 12, 2009, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.1723 = $11,723. If 10 days of the violations occurred after January 12, 2009 through December 6, 2013, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.2875 = $12,875. If 10 days of the violations occurred after December 6, 2013, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.3502 = $13,502.

(c) **For those penalty policies that were issued or revised after March 15, 2004, through January 12, 2009:** Calculate the gravity component according to the penalty policy. For violations that occurred after March 15, 2004 through January 12, 2009, use the gravity component set forth in the penalty policy, as the 10% first-time adjustment and 17.23% COLA are reflected in those policies. For violations occurring after January 12, 2009 through December 6, 2013, multiply the gravity component by 1.0983, reflecting the 9.83% COLA. For violations occurring after December 6, 2013, multiply the gravity component by 1.1518, reflecting both the 9.83% and the 4.87% COLAs [1.0983 x 1.0487 = 1.1518].

Assume, for example, that under the applicable penalty policy, the initial gravity-based penalty is $1,000 for each day of violation. If 10 days of the violations occurred after January 12, 2009 through December 6, 2013, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.0983 = $10,983. If 10 days of the violations occurred after December 6, 2013, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.1518 = $11,518.

(d) **For those penalty policies that were issued or revised after January 12, 2009, through December 6, 2013:** Calculate the gravity component according to the penalty policy. For violations that occurred after January 12, 2009 through December 6, 2013, use the gravity component set forth in the penalty policy, as the 9.83% COLA is reflected in these policies. For violations occurring after December 6, 2013, multiply the gravity component by 1.0487, reflecting the 4.87% COLA. Assume, for example, that under the applicable penalty policy, the initial gravity-based penalty is $1,000 for each day of violation. If 10 days of the violations occurred after December 6, 2013, the gravity inflation-adjusted penalty for those violations would be calculated as follows: 10 days x $1,000 = $10,000 x 1.0487 = $10,487.

IV. Penalty Pleading

If all of the violations in a particular case occurred on or before the effective date of the 2013 Rule, the pleading practices set forth in the 2008 Memorandum should be applied. If some of the violations in a particular case occurred after the effective date of the 2013 Rule, then any penalty amount sought should reflect the newly adjusted civil penalty amounts for those violations.

For example, if a person tampered with a public water system on November 7, 2013, the maximum statutory penalty under SDWA Section 1432(c) would be $1,100,000. The prayer for relief under such facts would be written as follows:

Pursuant to Section 1432(c) of the Safe Drinking Water Act, 42 U.S.C. § 300t-1(c), and 40 C.F.R. Part 19, assess civil penalties against [name of Defendant] of not more than $1,100,000 for tampering with the public water supply on November 7, 2013.

If violations occur after the effective date of the 2013 Rule (i.e., after December 6, 2013), then any penalty amount pled should use the newly adjusted maximum amount, if any. For example, if an act of tampering occurs on December 7, 2013, the prayer for relief in a civil judicial complaint alleging a violation of Section 1432(c) of the SDWA would be written as follows:

Pursuant to Section 1432(c) of the Safe Drinking Water Act, 42 U.S.C. § 300t-1(c), and 40 C.F.R. Part 19, assess civil penalties against [name of Defendant] of not more than $1,150,000 for tampering with the public water supply on December 7, 2013.

V. Administrative Penalty Caps for the CWA, CACSOA, SDWA, CAA, CERCLA and EPCRA

The 2013 Rule increases the statutory penalty amounts that may be sought for individual violations in administrative enforcement actions, as well as the total amounts that may be sought in a single administrative enforcement action under the CWA, the CACSOA, the SDWA, the CAA, the CERCLA and the EPCRA (commonly called "penalty caps"). For example, prior to the 2013 Rule, the EPA was authorized under CAA Section 205(c)(1) to assess administrative penalties not to exceed $295,000 for tampering with a vehicle or engine. After the effective date of the 2013 Rule, the EPA may assess an administrative penalty not to exceed $320,000 under CAA Section 205(c)(1). Note that the adjusted penalty caps apply if an action is filed or a complaint is amended after December 6, 2013, even if some or all of the violations occurred on or before December 6, 2013.

---

*E.g., the statutory maximum amount of administrative penalties that can be assessed under SDWA Section 1423(c)(1), 42 U.S.C. § 300h-2(c)(1), will increase from $177,500 to $187,500; the statutory maximum amount of administrative penalties that can be assessed under SDWA Section 1423(c)(2), 42 U.S.C. § 300h-2(c)(2), will increase from $177,500 to $187,500; the statutory maximum amount of administrative penalties that can be assessed under CAA Section 113(d)(1), 42 U.S.C. § 7413(d)(1), will increase from $295,000 to $320,000; the statutory maximum amount of administrative penalties that can be assessed under CAA Section 205(c)(1), 42 U.S.C. § 7524(c)(1), will increase from $295,000 to $320,000.*
VI. Expedited Settlements

Expedited settlements offer "real time" enforcement in situations where violations are corrected and a penalty is obtained in a short amount of time, generally within 30-45 days of the issuance of an expedited settlement offer. Expedited settlements serve to achieve compliance while reducing transaction costs for both the EPA and the violator, as long as the violator comes into compliance promptly and pays the expedited penalty amount. Rather than apply the inflation factors across the board to expedited penalty amounts at this time, national program managers within OECA should review expedited penalty amounts periodically to determine whether they need to be adjusted to reflect inflation.

VII. Challenges in the Course of Enforcement Proceedings

If a respondent/defendant challenges the validity of any statutory maximum penalty amount, as adjusted in 40 C.F.R. Part 19, please notify the Special Litigation and Projects Division of the challenge, so that OECA, the Region and the U.S. Department of Justice, as appropriate, can coordinate our response before it is filed.

VIII. Further Information

Any questions concerning the 2013 Rule and its implementation can be directed to Caroline Hermann of OCE's Special Litigation and Projects Division at (202) 564-2876 or by email at hermann.caroline@epa.gov.

and amended citations in two provisions of the construction standards to show the correct incorporation-by-reference section.

In the DFR, OSHA stated that it would confirm the effective date of the DFR if it received no significant adverse comments. OSHA received eight favorable and no adverse comments on the DFR (see ID: OSHA–2013–0005–0005 through 0015 in the docket for this rulemaking). Accordingly, OSHA is confirming the effective date of the final rule.

In addition to explicitly supporting the DFR, several of the commenters provided supplemental information. Mr. Charles Johnson of Altair Street LLC stated that as a result of "[OSHA]'s incorporation both the 1968 and the [2011] versions of the ANSI Z535 standard by reference[,] both manufacturers and employers will likely migrate to the newer versions and the older versions will likely fade away as demand declines" (ID: OSHA–2013–0005–0013). Mr. Johnson also commented that "[i]f OSHA deleted the reference to the ANSI Z535.1–1968 language, these signs would require replacement at considerable and unnecessary cost to employers." Id.

A second commenter, Mr. Blair Brewster of MySafetySign.com, described several advantages and limitations of the updated ANSI signage standards, concluding that "[t]he language, while not inaccurate, was unclear regarding which figure(s) it intended to reference in the ANSI Z535.2–2011 standard." Although this comment was late, OSHA considered it because it was a purely technical comment, pointing out an ambiguity in the cited provision's reference to figures in the updated version of the national consensus standard, ANSI Z535.2–2011. OSHA finds that the comment has merit, and accordingly is clarifying the language in 29 CFR 1926.200(b) and (c) specifying which figure employers must follow in ANSI Z535.2–2011.

RIN 2020–AA49

Civil Monetary Penalty Inflation Adjustment Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: With this action, EPA is promulgating a final rule that amends the Civil Monetary Penalty Inflation Adjustment Rule. This action is mandated by the Debt Collection Improvement Act of 1996 (DCIA) to adjust for inflation certain statutory civil monetary penalties that may be assessed for violations of EPA–administered statutes and their implementing regulations. The Agency is required to review the civil monetary penalties under the statutes it administers at least once every four years and to adjust such penalties as necessary for inflation according to a formula prescribed by the DCIA. The regulations contain a list of all civil monetary penalty authorities under EPA–administered statutes and the applicable statutory amounts, as adjusted for inflation, since 1996.

DATES: This rule is effective December 6, 2013.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to section 4 of the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, as amended by the DCIA, 31 U.S.C. 3701 note, each federal agency is required to issue regulations adjusting for inflation the statutory civil monetary penalties ("fines" or "penalties") that can be imposed under the laws administered by that agency. The purpose of these adjustments is to

Section 3 of the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, as amended by the DCIA, 31 U.S.C. 3701 note, defines "civil monetary penalty" to mean "any penalty, fine or other sanction that--(A) is for a specific monetary amount as provided by federal law; or (B) has a maximum amount provided for by federal law; . . . . "
maintain the deterrent effect of civil penalties and to further the policy goals of the underlying statutes. The DCIA requires adjustments to be made at least once every four years following the initial adjustment. EPA’s initial adjustment to each statutory civil penalty amount was published in the Federal Register on December 31, 1996 (61 FR 65360), and became effective on January 30, 1997 (“the 1996 Rule”). EPA’s second adjustment to civil penalty amounts was published in the Federal Register on February 13, 2004 (69 FR 7121), and became effective on March 15, 2004 (“the 2004 Rule”). EPA’s third adjustment to civil penalty amounts was published in the Federal Register on December 11, 2008 (73 FR 75930), as corrected in the Federal Register on January 7, 2009 (74 FR 926), and became effective on January 12, 2009 (“the 2008 Rule”). Where necessary under the DCIA, this rule, specifically Table 1 in 40 CFR 19.4, adjusts for inflation the maximum and, in some cases, the minimum amount of the statutory civil penalty that may be imposed for violations of EPA-administered statutes and their implementing regulations. Table 1 of 40 CFR 19.4 identifies the applicable EPA-administered statutes and sets out the inflation-adjusted civil penalty amounts that may be imposed pursuant to each statutory provision after the effective dates of the 1996, 2004 and 2008 rules. Where required under the DCIA formula, this rule amends the adjusted penalty amounts in Table 1 of 40 CFR 19.4 for those violations that occur after the effective date of this rule. The formula prescribed by the DCIA for determining the inflation adjustment, if any, to statutory civil penalties consists of the following four-step process: 1. Determine the Cost-of-Living Adjustment (COLA). The COLA is determined by calculating the percentage increase, if any, by which the Consumer Price Index 2 for all-urban consumers (CPI-U) for the month of June of the calendar year preceding the adjustment exceeds the CPI-U for the month of June of the calendar year in which the amount of such civil monetary penalty was last set or adjusted. 3 Accordingly, the COLA applied under this rule equals the percentage by which the CPI-U for June 2012 (i.e., June of the year preceding this year) exceeds the CPI-U for June of the year in which the amount of a specific penalty was last adjusted (i.e., 2008, 2004 or 1996, as the case may be). Given that the last inflation adjustment was published on December 11, 2008, the COLA for most civil penalties set forth in this rule was calculated by determining the percentage by which the CPI-U for June 2012 (229.478) exceeds the CPI-U for June 2008 (218.815), resulting in a COLA of 4.87 percent. For those few civil penalty amounts that were last adjusted under the 2004 Rule, the COLA equals 20.97 percent, calculated by determining the percentage by which the CPI-U for June 2012 (229.478) exceeds the CPI-U for June 2004 (189.7). In the case of those maximum civil penalties that may be imposed under section 311(b)(7)(A) of the Clean Water Act, 33 U.S.C. 1321(b)(7)(A), which is the sole civil penalty last adjusted under the 1996 Rule, the COLA is 46.45 percent, determined by calculating the percentage by which the CPI-U for June 2012 (229.478) exceeds the CPI-U for June 1996 (156.7). 2. Calculate the Raw Inflation Increase. Once the COLA is determined, the second step is to multiply the COLA by the current civil penalty amount to determine the raw inflation increase. 3. Apply the DCIA’s Rounding Rule to the Raw Inflation Increase. The third step is to round this raw inflation increase according to section 5(a) of the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, as amended by the DCIA, 31 U.S.C. 3701 note. The DCIA’s rounding rules require that any increase be rounded to the nearest multiple of: $10 in the case of penalties less than or equal to $100; $100 in the case of penalties greater than $100 but less than or equal to $1,000; $1,000 in the case of penalties greater than $1,000 but less than or equal to $10,000; $10,000 in the case of penalties greater than $10,000 but less than or equal to $100,000; $100,000 in the case of penalties greater than $100,000 but less than or equal to $200,000; and $250,000 in the case of penalties greater than $200,000. (See section 5(a) of the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, as amended by the DCIA, 31 U.S.C. 3701 note.) 4. Add the Rounded Inflation Increase, if any, to the Current Civil Penalty Amount. Once the inflation increase has been rounded pursuant to the DCIA, the fourth step is to add the rounded inflation increase to the current civil penalty amount to obtain the new, inflation-adjusted civil penalty amount. For example, in this rule, the current statutory maximum penalty amounts that may be imposed under Clean Air Act (CAA) section 113(d)(1), 42 U.S.C. 7413(d)(1), and CAA section 205(c)(1), 42 U.S.C. 7524(c)(1), are increasing from $295,000 to $320,000. These penalty amounts were last adjusted with the promulgation of the 2008 Rule, when penalties were adjusted for inflation from $270,000 to $295,000. Applying the COLA adjustment to the current penalty amount of $295,000 results in a raw inflation increase of $14,376 for both penalties. As stated above, the DCIA rounding rule requires the raw inflation increase to be rounded to the nearest multiple of $25,000 for penalties greater than $200,000. Rounding $14,376 to the nearest multiple of $25,000 equals $25,000. That rounded increase increment of $25,000 is then added to the $295,000 penalty amount to arrive at a total inflation adjusted penalty amount of $320,000. Accordingly, once this rule is effective, the statutory maximum amounts of these penalties will increase to $320,000. In contrast, this rule does not adjust those civil penalty amounts where the raw inflation amounts are not high enough to round up to the required multiple stated in the DCIA. For example, under section 308(b)(3) of the Resource Conservation and Recovery Act, 42 U.S.C. 6928(a)(3), the Administrator may assess a civil penalty of up to $37,500 per day of noncompliance for each violation. This penalty was last adjusted for inflation under the 2008 Rule. Multiplying the applicable 4.87 percent COLA to the statutory civil penalty amount of $37,500, the raw inflation increase equals only $1,827.40; the DCIA rounding rule requires a raw inflation increment to be rounded to the nearest multiple of $5,000 for penalties greater than $10,000 but less than or equal to $100,000. Because this raw inflation increase is less than the current penalty amount to be rounded up to a multiple of $5,000, in accordance with the DCIA’s rounding rule, this rule does not increase the $37,500 penalty amount. However, if during the development of EPA’s next Civil Monetary Penalty Inflation Adjustment Rule, anticipated to be
promulgated in 2017, the raw inflation increase can be rounded up to the next multiple of $5,000,000,000, statutory maximum penalty amounts currently at $37,500 will be increased to $42,500.

Because of the low rate of inflation since 2008, coupled with the application of the DCIA’s rounding rules, only 20 of the 88 statutory civil penalty provisions implemented by EPA are being adjusted for inflation under this rule. Assuming there are no changes to the mandates imposed by the DCIA, EPA intends to review all statutory penalty amounts and adjust them as necessary to account for inflation in the year 2017 and every four years thereafter.

II. Technical Revision to Table 1 of 40 CFR 19.4 To Break Out Each of the Statutory Penalty Authorities Under Section 325(b) of the Emergency Planning and Community Right-To-Know Act (EPCRA)

EPA is revising the row of Table 1 of 40 CFR 19.4, which lists the statutory maximum penalty amounts that can be imposed under section 325(b) of EPCRA, 42 U.S.C. 11045(b), to break out separately the three penalty authorities contained in subsection (b). Since 1996, EPA has been adjusting for inflation all of the statutory maximum penalty amounts specified under EPCRA section 325(b), 42 U.S.C. 11045(b). Under past rules, the Agency has grouped the maximum penalty amounts that may be assessed under section 325(b) under the heading of 42 U.S.C. 11045(b) in Table 1 of 40 CFR 19.4. For example, under the 2008 Rule, Table 1 of 40 CFR 19.4 reflects that the statutory maximum penalties that can be imposed under any subparagraph of EPCRA section 325(b) are $37,500 and $107,500. Consistent with how the other penalty authorities are displayed under Part 19.4, Table 1 now delineates, on a subpart-by-subpart basis, the penalty authorities enumerated under section 325(b) of EPCRA, 42 U.S.C. 11045(b) (i.e., 42 U.S.C. 11045(b)(1)(A), (b)(2), and (b)(3)). That is, upon the effective date of this rule, the statutory maximum penalty that can be imposed under section 325(b)(1)(A) is $37,500; the statutory maximum penalties that can be imposed under section 325(b)(2) are $37,500 and $117,500; and the statutory maximum penalties that can be imposed under section 325(b)(3) are $37,500 and $117,500.

III. Effective Date

Section 6 of the DCIA provides that “any increase under [the DCIA] in a civil monetary penalty shall apply only to violations which occur after the date

the increase takes effect.” (See section 6 of the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, as amended by the DCIA, 31 U.S.C. 3701 note.) Thus, the new inflation-adjusted civil penalty amounts may be applied only to violations that occur after the effective date of this rule.

IV. Good Cause

Section 553(b) of the Administrative Procedure Act (APA) provides that, when an agency for good cause finds that “notice and public procedure . . . are impracticable, unnecessary, or contrary to the public interest,” the agency may issue a rule without providing notice and an opportunity for public comment. EPA finds that there is good cause to promulgate this rule without providing for public comment. The primary purpose of this final rule is merely to implement the statutory directive in the DCIA to make periodic increases in civil penalty amounts by applying the adjustment formula and rounding rules established by the statute. Because the calculation of the increases is formula-driven and prescribed by statute, EPA has no discretion to vary the amount of the adjustment to reflect any views or suggestions provided by commenters. Accordingly, it would serve no purpose to provide an opportunity for public comment on this rule. Thus, notice and public comment is unnecessary.

In addition, EPA is making the technical revisions discussed above without notice and public comment. Because the technical revisions to Table 1 of 40 CFR 19.4 more accurately reflect the statutory provisions under each of the subparagraphs of section 325(b) (i.e., under 42 U.S.C. 11045(b)(1)(A), (b)(2), and (b)(3)) and do not constitute substantive revisions to the rule, these changes do not require notice and comment.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a “significant regulatory action” under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and therefore is not subject to review under the Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3521. Burden is defined at 5 CFR 1320.3(b).

This rule increases the amount of civil penalties that could be imposed in the context of a federal civil administrative enforcement action or civil judicial case for violations of EPA-administered statutes and their implementing regulations.

C. Regulatory Flexibility Act

Today’s final rule is not subject to the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612, which generally requires an agency to prepare a regulatory flexibility analysis for any rule that will have a significant economic impact on a substantial number of small entities. The RFA applies only to rules subject to notice and comment rulemaking requirements under the APA or any other statute. This rule is not subject to notice and comment requirements under the APA or any other statute because although the rule is subject to the APA, the Agency has invoked the “good cause” exemption under 5 U.S.C. 553(b); therefore it is not subject to the notice and comment requirements.

D. Unfunded Mandates Reform Act

This action contains no federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for state, local, or tribal governments or the private sector. The action implements mandates specifically and explicitly set forth by Congress in the DCIA without the exercise of any policy discretion by EPA. By applying the adjustment formula and rounding rules prescribed by the DCIA, this rule adjusts for inflation the statutory maximum and, in some cases, the minimum, amount of civil penalties that can be assessed by EPA in an administrative enforcement action, or by the U.S. Attorney General in a civil judicial case, for violations of EPA-administered statutes and their implementing regulations. Because the calculation of any increase is formula-driven, EPA has no policy discretion to vary the amount of the adjustment.

Given that the Agency has made a “good cause” finding that this rule is not subject to notice and comment requirements under the APA or any other statute (see Section IV of this Notice), it is not subject to sections 202 and 205 of UMRA. EPA has also determined that this action is not subject to the requirements of section 203 of UMRA because it contains no regulatory requirements that might significantly or uniquely affect small governments. This rule merely increases
the amount of civil penalties that could conceivably be imposed in the context of a federal civil administrative enforcement action or civil judicial case for violations of EPA-administered statutes and their implementing regulations.

E. Executive Order 13132 (Federalism)

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This rule merely increases the amount of civil penalties that could conceivably be imposed in the context of a federal civil administrative enforcement action or civil judicial case for violations of EPA-administered statutes and their implementing regulations. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). This rule merely increases the amount of civil penalties that could be imposed in the context of a federal civil administrative enforcement action or civil judicial case for violations of EPA-administered statutes and their implementing regulations. This final rule will not have substantial direct effects on tribal governments, on the relationship between the federal government and Indian tribes, or on the distribution of power and responsibilities between the federal government and Indian tribes. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19865, April 23, 1997) as applying only to those regulatory actions that create health or safety risks, such that the analysis required under section 5-501 of the Executive Order has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not a significant regulatory action under Executive Order 12666.

I. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (‘‘NTTAA’’), 15 U.S.C. 272 note, directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed and adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through the U.S. Office of Management and Budget, explanations when the Agency decides not to use available and applicable voluntary consensus standards. This action does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (50 FR 7629, February 16, 1994) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States. EPA lacks the discretionary authority to address environmental justice in this final rulemaking. The primary purpose of this final rule is merely to apply the DCIA’s inflation adjustment formula to make periodic increases in the civil penalties that may be imposed for violations of EPA-administered statutes and their implementing regulations. Thus, because calculation of the increases is formula-driven, EPA has no discretion in updating the rule to reflect the allowable statutory civil penalties derived from applying the formula.

Since there is no discretion under the DCIA in determining the statutory civil penalty amount, EPA cannot vary the amount of the civil penalty adjustment to address other issues, including environmental justice issues.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801–808, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 19

Environmental protection, Administrative practice and procedure, Penalties.

Gina McCarthy,
Administrator, Environmental Protection Agency.

For the reasons set out in the preamble, title 40, chapter I, part 19 of the Code of Federal Regulations is amended as follows:

PART 19—ADJUSTMENT OF CIVIL MONETARY PENALTIES FOR INFLATION

1. The authority citation for part 19 continues to read as follows:

2. Revise § 19.2 to read as follows:

§ 19.2 Effective date.

The increased penalty amounts set forth in the seventh and last column of Table 1 to § 19.4 apply to all violations under the applicable statutes and regulations which occur after December 6, 2013. The penalty amounts in the sixth column of Table 1 to § 19.4 apply to violations under the applicable statutes and regulations which occurred after January 12, 2009, through December 6, 2013. The penalty amounts in the fifth column of Table 1 to § 19.4 apply to all violations under the applicable statutes and regulations

§19.4 Penalty adjustment and table.
The adjusted statutory penalty provisions and their applicable amounts are set out in Table 1. The last column in the table provides the newly effective statutory civil penalty amounts.

</tbody>
</table>

1 Note that 33 U.S.C. 1441b(h)(1)(B) contains additional penalty escalation provisions that must be applied to the penalty amounts set forth in this Table. The amounts set forth in this Table reflect an inflation adjustment to the calendar year 1992 penalty amount expressed in section 1048(b)(1)(A), which is used to calculate the applicable penalty amount under MPRSA section 1048(b)(1)(B) for violations that occur in any subsequent calendar year.

2 CACSO was passed on December 21, 2003 as part of Title XIV of the Consolidated Appropriations Act of 2001, Pub. L. 106-554, 33 U.S.C. 1901 note. The original statutory penalty amounts of $30,000 and $50,000 under section 1430(c) of the SDWA, 42 U.S.C. 300t(c), were subsequently increased by Congress pursuant to section 403 of the Public Health Security and Bioterrorism Preparedness and Response Act of 2002, Public Law No. 107–188 (June 12, 2002), to $100,000 and $1,000,000, respectively. EPA did not adjust these new penalty amounts in its 2003 Civil Monetary Penalty Inflation Adjustment Rule ("2004 Rule"), 68 FR 7121 (February 13, 2004), because they had gone into effect less than two years prior to the 2004 Rule.

*Consistent with how the EPA's other penalty authorities are displayed under Part 19.4, this Table now omits, on a subpart-by-subpart basis, the penalty authorities enumerated under section 3250(c) of EPCRA, 42 U.S.C. 11045(c)(i.e., 42 U.S.C. 11045(c)(1)(A), (1)(B) and (1)(C)).

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 52**

[EA/PR-060-0AR-2010-0335; FRL-9902-50; Region 6]

Approval and Promulgation of Implementation Plans; Texas; Procedures for Stringency Determinations and Minor Permit Revisions for Federal Operating Permits

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Withdrawal of direct final rule.

**SUMMARY:** On September 10, 2013, EPA published a direct final rule approving portions of three revisions to the Texas State Implementation Plan (SIP) concerning the Texas Federal Operating Permits Program. The direct final action was published without prior proposal because EPA anticipated no adverse comments. EPA stated in the direct final rule that if we received relevant, adverse comments by October 10, 2013, EPA would publish a timely withdrawal in the Federal Register. EPA subsequently received timely adverse comments on the direct final rule. Therefore, EPA is withdrawing the direct final approval and will proceed to respond to all relevant, adverse comments in a subsequent action based on the parallel proposal published on September 10, 2013. As stated in the parallel proposal, EPA will not institute a second comment period on this action.

**DATES:** The direct final rule published on September 10, 2013 (78 FR 55221), is withdrawn as of November 6, 2013.

---

**FOR FURTHER INFORMATION CONTACT:** Ms. Adina Wiley (6PD-R), Air Permits Section, Environmental Protection Agency, Region 6, 1445 Ross Avenue (6PD-R), Suite 1200, Dallas, TX 75202-2733. The telephone number is (214) 665-2115. Ms. Wiley can also be reached via electronic mail at wiley.adina@epa.gov.
