

Manufacturer: Faubel Pharma Services
Model: CRSF Blister Pack
ASTM Type: VIIIIC(3)

Description:

This is a semi-rigid blister non-reclosable package. The front of the card covers each capsule with a clear semi-rigid plastic film and the back of the card is a multi-layer combination with a peel-away plastic cover top layer (Figure 1, 2).

Figure 1

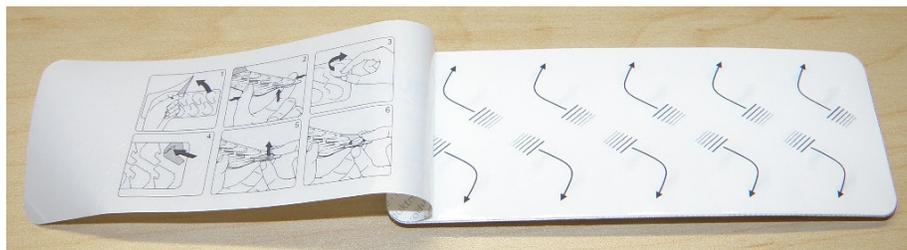

Figure 2

The package is opened by first peeling away the top layer to expose the opening instructions (Figure 2). The next step is to bend the back of the card along its longitudinal axis to expose the end of a tab (Figure 3). The tab is then grasped and pulled away from the back of the card (Figure 4), after which the tablet may be pushed through the foil-backed barrier (Figure 5).

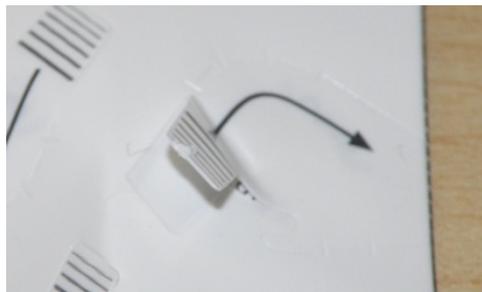

Figure 3

Figure 5

The manufacturer's instructions on the inside of the first barrier are pictorial (Figure 6). These pictures depict the steps described above.
