IRIS Workshop on the NRC Recommendations

IRIS has embraced and is acting to implement systematic review

IRIS welcomes extensive public engagement – on methods as well as on assessments

Going forward . . .

- **IRIS is an evolving program.** Methods, as they are developed, will be incorporated into new-start assessments
- **IRIS is a science program.** Methods will be documented and peer-reviewed
- **IRIS will be a productive program.** Methods should:
 1. Facilitate subsequent assessment development
 2. Promote constructive public discussion
 3. Use program resources efficiently
