

Oil Industry Perspective

Mobile Source Technology Review Subcommittee

September 19, 2007

**Don Clay
Chairman, Alternative Fuel Standard Workgroup
NPRA Issues Committee**

Introduction

- Do not support mandates
- Do not support the President's Twenty in Ten program
- Want to work with EPA

Characteristics

- Regulatory program should be tiered
 - Prediction ability 10+ years is limited
 - Need time to make decisions and investments
 - Use on-ramp, not enforcement discretion
 - Infrastructure concerns for increased biofuels use may be an issue

Characteristics

- Level of standards should be based realistic parameters
 - Sound science
 - Analysis of benefits and cost
 - Public safety
 - Economic growth

Characteristics

- Fuel comparison must be scientifically supported and accurately reflect environmentally and energy values
- Fairness is important
- Fuel and vehicle rules should be integrated
- State/local biofuel regulations should be preempted

Conclusions

- Set realistic goals
- Use tiered approach
- Use sound science
- We will work with you
