Personal (at home or office):

When printing the postcards, use cardstock or a heavier weight paper. There are many pre-perforated paper stocks that are specifically used for postcards available online or at your local office supply store. These postcard kits typically have their own printing instructions. If not using a pre-perforated paper option, follow the print instructions below:

1. Open the file in Acrobat, then open the print setup window.
2. Select your paper size. The postcards are 9”x6.” They print best on 11”x8.5.” Select “actual size” to print at 100%.
3. Select two-sided (duplex) printing.
4. Select “landscape” in the orientation section.
5. Press “Print.”
6. Trim with a ruler and an X-Acto knife or carefully with scissors.

Professional (print vendor):

Size: 9”x6”
Sides: Front/back
Bleeds: 4 sides
Paper: 100# Anthem Gloss, Cover (or similar house sheet)
Bindery: Trim

Rest easy this summer with a properly maintained septic system.

Did you know?

Common household tasks can add hundreds of extra gallons of water every day, straining your septic system.

Don’t Strain Your Drain!

Overloading your septic system with water is a leading cause of failure.

EPA-832-E-12-003
September 2012

Save water and support your septic system’s health. For the long-term care of your system, have your septic tank inspected and pumped out by a licensed septic tank contractor as needed (on average every three to five years).
