## Clean Watersheds Needs Survey 2004

### The Clean Watersheds Needs Survey

(CWNS) is a comprehensive assessment of needs<sup>1</sup> to meet the water quality and water-related public health goals of the Clean Water Act (CWA). States and the U.S. Environmental Protection Agency (EPA) conduct the CWNS every four years under CWA Sections 205(a) and 516 (b)(1).

Ohio reported needs totaling \$12.9 billion in 2004. This is a thirty-three percent increase from the \$9.7 billion in needs reported in 2000.

### Reported Needs in Ohio

Type of Need	Needs (2004 Dollars, Millions)		
	2000	2004	Percent Change
Wastewater treatment plant improvements	\$1,793	\$1,912	7%
Wastewater collection and conveyance improvements	\$3,186	\$3,561	12%
Combined sewer overflow correction	\$4,034	\$6,284	56%
Stormwater management controls	nr <sup>b</sup>	\$4	n/a
Home sewage treatment system improvements	n/a	\$290	n/a
Recycled wastewater distribution <sup>a</sup>	n/a	nr	n/a
<b>Total Wastewater Treatment Needs</b>	<b>\$9,013</b>	<b>\$12,051</b>	<b>34%</b>
Agriculture best management practices (BMPs)	\$219	\$620	183%
Forestry BMPs	\$1	\$1	0%
Residential/ business development BMPs	\$392	\$127	-68%
Ground water protection BMPs	\$5	nr	n/a
Marinas and boating BMPs	nr	nr	n/a
Mining and quarrying BMPs	\$24	\$24	0%
Contaminated industrial site (Brownfield) remediation	nr	nr	n/a
Leaking storage tank remediation	nr	nr	n/a
Sanitary landfill BMPs	nr	nr	n/a
Water resource restoration and protection	\$57	\$115	102%
<b>Total Nonpoint Source Pollution Control Needs<sup>c</sup></b>	<b>\$698</b>	<b>\$887</b>	<b>27%</b>
<b>Total Needs</b>	<b>\$9,711</b>	<b>\$12,938</b>	<b>33%</b>

<sup>a</sup> The CWNS did not collect data on recycled water distribution in 2000

<sup>b</sup> Not reported

<sup>c</sup> The actual NPS pollution control needs are expected to be higher since documenting and reporting their costs is difficult.

<sup>1</sup> Costs in the CWNS are generally eligible for funding under the Clean Water Act State Revolving Fund (CWSRF). All needs are capital needs except stormwater management needs, which include program development costs. The survey is a "snapshot" of data and needs; needs are as of January 1, 2004, and all costs are in January 2004 dollars.

## Ohio Clean Watersheds Needs Survey 2004

The enactment of the Clean Water Act (CWA) in 1972 resulted in dramatic improvements in the:

- Number of wastewater treatment plants.
- Percentage of the population served by wastewater treatment plants.
- Level of effluent treatment from wastewater treatment plants.

In 2004, 76% of Ohio residents received centralized wastewater treatment services at the secondary, greater than secondary, or no discharge treatment level, compared to 45% in 1972.

Treatment Level	Number of Facilities			Population Served			
	1972	2004	Projected <sup>a</sup>	1972	% Total Population	2004 <sup>b</sup>	Projected <sup>a</sup>
					1972		
Less than Secondary	62	0	0	2,339,000	21.7%	0	0%
Secondary	134	172	173	1,295,000	12.0%	1,267,225	11.1% 1,457,966
Greater than Secondary	214	604	674	3,534,000	32.8%	7,454,278	65.1% 8,844,799
No Discharge	0	3	5	0	0%	1,074	< 0.1% 1,672
<b>Total</b>	<b>410</b>	<b>779</b>	<b>852</b>	<b>7,168,000</b>	<b>66.6%</b>	<b>8,722,577</b>	<b>76.1% 10,304,437</b>

<sup>a</sup> Number of facilities and population served if all needs documented in the CWNS 2004 are met.

<sup>b</sup> The remaining population is largely served by home and cluster sewage treatment systems.

(Number of facilities from Tables C-7 and C-8 of the CWNS 2004 Report to Congress)

### What are treatment levels?

- *Less than secondary treatment* removes solids by filtration, sedimentation, and chemical coagulation.
- *Secondary treatment* removes most of the organic matter in wastewater using biological processes.
- *Greater than secondary treatment* removes additional organic matter, nitrogen, phosphorus, or toxics.
- *No discharge facilities* include facilities that reuse wastewater, discharge to an underground aquifer, or dispose of wastewater via methods such as irrigation or evaporation.

The CWA goals of fishable, swimmable and drinkable waters require secondary or greater treatment.

Small communities often need additional assistance to meet CWA requirements, because they often lack adequate financing, training, and economies of scale to efficiently manage and maintain wastewater treatment systems.

In Ohio, small community wastewater facilities serve 14% of the population and comprise 8% of total wastewater treatment and collection needs. EPA small community support information is available at:  
[www.epa.gov/owm/mab/smcomm](http://www.epa.gov/owm/mab/smcomm)

Reported Needs for Facilities in Small Communities				
Population	Facilities		Needs (2004 Dollars, Millions)	
	2000	2004	2000	2004
< 1,000	233	265	\$298	\$344
1,000-3,499	113	139	\$335	\$371
3,500-10,000	52	62	\$252	\$275
<b>Total</b>	<b>398</b>	<b>466</b>	<b>\$885</b>	<b>\$990</b>
