Additional work may include DRMS assistance with monitoring and assessing impacts caused by the Red and Bonita bulkhead on the hydrology of the Cement Creek and Upper Animas drainages, particularly related to discharges from vicinity mines.

Component 1: Red and Bonita bulkhead design.

(DRMS/(b) (6) 150 work hours): \$8925.00

Output: A complete design and specification package will be prepared for a water impounding concrete bulkhead for the Red and Bonita Mine.

Component 2: Assist EPA with technical planning associated with underground workings preparations and contractor equipment requirements required to perform bulkhead construction.

(DRMS/(b) (6) 120.17 work hours): \$7150.00

Output: Office and field engineering support including planning documents and meetings during and after the selection of the bulkhead installation contractor(s).

Component 3: Construction Phase Inspections

(DRMS/(b) (6) 150 work hours) \$8925.00

Output: Perform onsite inspections during the construction phase on a periodic basis to evaluate the preparation of the bulkhead site and construction of the bulkhead and provide field engineering support if needed. This work will occur between July and October 2015.

TOTAL: \$25,000.00

Basis for Estimated Costs:

(b) (6) Hourly: \$55.00 + 8.18% indirect = \$59.50

Timelines/Milestones:

Component 1 completed prior to 3/31/15

Component 2 completed prior to 8/1/15

Component 3 completed prior to 11/30/15

Progress Reports:

The project closeout report will be submitted to the Project Officer on or before 3/31/16.

Brief Duty Description: Provides staff authority and technical guidance, independent engineering review and oversight to IMP Director, and all IMP Program Managers and Staff in the design and implementation of underground source-water controls and construction reclamation projects at sites statewide by using specific mining engineering expertise, knowledge and analysis of engineering and geotechnical designs, program safety and performance rules, and engineering and underground mining practices not possessed by other IMP Program Staff for underground construction projects.

Analyzes and guides the engineering design criteria, standard of care and best engineering practice in order to advise the Program Director and work unit staffs on technical problems alternative designs and solutions to maximize safety, constructability, cost management and effectiveness of underground source controls approaches by monitoring, measuring, and evaluating designs and input parameters, conducting research, and by monitoring performance and inspecting underground construction processes, materials and specifications during underground construction projects.

Ensures that reclamation plans developed by others will meet state of practice engineering requirements appropriate factors of safety and all State and Federal Rules and Regulations by analysis and cross-checking with established engineering best practices, testing technical assumptions and checking engineering and geotechnical calculations, and assuring that projects will result in acceptable standards of environmental protection.

Plans, manages and implements underground mine drainage control projects across team boundaries in IMP, EPA and CDPHE programs by coordinating schedules and assigning investigation, data collection and construction projects to other work unit members, inspectors, and by performing complex or critical response underground reclamation construction projects.

Tracks budgets, schedules and ensures that completion documentation for all underground mining reclamation projects meets prescribed formats and requirements by writing closeout reports, and reviewing project closeout reports and contract documentation prepared by other project managers for quality and completeness.

Treatment of fringe benefits: Fringe benefits applicable to direct salaries and wages are treated as direct costs; fringe benefits applicable to indirect salaries and wages are treated as indirect costs.

Section II: General

Page 1 of 3

A. Limitations: Use of the rates contained in this agreement is subject to any applicable statutory limitations. Acceptance of the rates agreed to herein is predicated upon these conditions: (1) no costs other than those incurred by the subject organization were included in its indirect cost rate proposal, (2) all such costs are the legal obligations of the grantee/contractor, (3) similar types of costs have been accorded consistent treatment, and (4) the same costs that have been treated as indirect costs have not been claimed as direct costs (for example, supplies can be charged directly to a program or activity as long as these costs are not part of the supply costs included in the indirect cost pool for central administration).

B. Audit: All costs (direct and indirect, federal and non-federal) are subject to audit. Adjustments to amounts resulting from audit of the cost allocation plan or indirect cost rate proposal upon which the negotiation of this agreement was based will be compensated for in a subsequent negotiation.

C. Changes: The rate(s) contained in this agreement are based on the organizational structure and the accounting system in effect at the time the proposal was submitted. Changes in organizational structure, or changes in the method of accounting for costs which affect the amount of reimbursement resulting from use of the rate(s) in this agreement, require the prior approval of the responsible negotiation agency. Failure to obtain such approval may result in subsequent audit disallowance.

D. Rate Type:

1. **Fixed Carryforward Rate:** The fixed carryforward rate is based on an estimate of the costs that will be incurred during the period for which the rate applies. When the actual costs for such periods have been determined, an adjustment will be made to the rate for future periods, if necessary, to compensate for the difference between the costs used to establish the fixed rate and the actual costs.

2. **Provisional/Final Rates:** Within 6 months after year end, a final indirect cost rate proposal must be submitted based on actual costs. Billings and charges to contracts and grants must be adjusted if the final rate varies from the provisional rate. If the final rate is greater than the provisional rate and there are no funds available to cover the additional indirect costs, the organization may not recover all indirect costs. Conversely, if the final rate is less than the provisional rate, the organization will be required to pay back the difference to the funding agency.

3. **Predetermined Rate:** The predetermined rate contained in this agreement is based on estimated costs which will be incurred during the period for which the rate applies and is normally not subject to subsequent carry-forward adjustments. However, if material changes occur in the grantee/contractor's cost structure, adjustments to the rate may be necessary to compensate for the effects of such changes.

E. Agency Notification: Copies of this document may be provided to other federal offices as a means of notifying them of the agreement contained herein.

F. Record Keeping: Organizations must maintain accounting records that demonstrate that each type of cost has been treated consistently either as a direct cost or an indirect cost. Records pertaining to the costs of program administration, such as salaries, travel, and related costs, should be kept on an annual basis.

G. Reimbursement Ceilings: Grantee/contractor program agreements providing for ceilings on indirect cost rate(s) or reimbursement amounts are subject to the ceilings stipulated in the contract or grant agreements. If the ceiling rate is higher than the negotiated rate in Section I of this agreement, the negotiated rate will be used to determine the maximum allowable indirect cost.

H. Use of Other Rate(s): If any federal programs are reimbursing indirect costs to this grantee/contractor by a measure other than the approved rate(s) in this agreement, the grantee/contractor should credit such costs to the affected programs, and the approved rate should be used to identify the maximum amount of indirect cost allocable to these programs.

I. Central Service Costs: Where central service costs are estimated for the calculation of indirect cost rate(s), adjustments will be made to reflect the difference between provisional and final amounts.

J. Other:

1. The purpose of an indirect cost rate is to facilitate the allocation and billing of indirect costs. Approval of the indirect cost rate does not mean that an organization can recover more than the actual costs of a particular program or activity.

2. Programs received or initiated by the organization subsequent to the negotiation of this agreement are subject to the approved indirect cost rate if the programs receive administrative support from the indirect cost pool. It should be noted that this could result in an adjustment to a future rate.

3. New indirect cost proposals are necessary to obtain approved indirect cost rate(s) for future fiscal or calendar years. The proposals are due in our office 6 months prior to the beginning of the year to which the proposed rate(s) will apply.
