Subject: Cape Wind

Let's not make another "BIG DIG" out of this. The numbers do not look good for this project. Wind might be an alternative, either the deep sea or smaller wind projects on land (why not on Route 6 in the median). The present project will impact an area that depends on tourism. If you must, consider the median alternative. Is Massachusetts about to confirm with the rest of the country on really how foolish we are? The only one to make money on this project will be the head person at Cape Wind. He will laugh all the way to Maine as he builds his new summer home there. (Why build on the Cape???) Let's get practical and real in our decisions. Thank you. Hotmail is redefining busy with tools for the New Busy. Get more from your inbox. [See how.](#)
