

National Drinking Water Advisory Council Climate Ready Water Utilities Working Group

Working Group Charge

The charge for the CRWU Working Group is to evaluate the concept of “Climate Ready Water Utilities” and provide recommendations to the full NDWAC on the development of an effective program for drinking water and wastewater utilities, including recommendations to: (1) Define and develop a baseline understanding of how to use available information to develop climate change adaptation and mitigation strategies, including ways to integrate this information into existing complementary programs such as the Effective Utility Management and Climate Ready Estuaries Program; (2) Identify climate change-related tools, training, and products that address short-term and long-term needs of water and wastewater utility managers, decision makers, and engineers, including ways to integrate these tools and training into existing programs; and (3) Incorporate mechanisms to provide recognition or incentives that facilitate broad adoption of climate change adaptation and mitigation strategies by the water sector into existing EPA Office of Water recognition and awards programs or new recognition programs.

Designated Federal Officer

Lauren Wisniewski
Environmental Engineer
U.S. Environmental Protection Agency

National Drinking Water Advisory Council Members of Working Group

Jeff Cooley
Utilities Division Operations Manager,
City of Vacaville, California

Duane Smith
Executive Director
Oklahoma Water Resource Board

Olga Morales-Sanchez
