

## Public Meeting and Webinar: Managing Cyanotoxins in Drinking Water

April 29, 2016

### General Notes:

- Participation in this meeting is both in-person and via webinar.
- For those online, clarifying questions and input to the discussion can be submitted at any time via the webinar chat feature. Facilitators will review and consolidate questions and input and raise as many issues as possible given the time allotted.
- Online participants will have the opportunity to “raise their hands” and speak during the afternoon discussion sessions.

8:45-9:15	Registration
9:15-9:25	Opening Remarks, Goals of the Meeting (Ryan Albert, USEPA)
9:25-9:55	Introduction to EPA cyanotoxin drinking water activities (Hannah Holsinger, USEPA)
9:55-10:20	Harmful Algal Bloom Monitoring and Response for Drinking Water in Colorado (David Dani, Colorado Department of Public Health & Environment)
10:20-10:45	2015 Bloom Season Observed Levels and Associated Impacts at Water Utilities (Adam Carpenter, American Water Works Association)
10:45-12:20	Feedback from stakeholders/lessons learned on strategies that Public Water Systems, States and EPA can use to manage risks from cyanotoxins in drinking water
12:20-12:30	Concluding Remarks
