PUBLIC NOTICE

Energy Transfer Partners, L.P., Lone Star NGL, Mont Belvieu Gas Plant
(PSD-TX-93813-GHG)

ANNOUNCEMENT OF PUBLIC NOTICE ON THE RESCISSION OF A CLEAN AIR ACT
GREENHOUSE GAS PREVENTION OF SIGNIFICANT DETERIORATION PRECONSTRUCTION
PERMIT

Public Notice Period May 17, 2016 – July 18, 2016

The United States Environmental Protection Agency (EPA) is providing notice of its decision to rescind
the Prevention of Significant Deterioration (PSD) permit for Greenhouse Gases (GHG) issued to Energy
Transfer Partners, L.P., Lone Star NGL, (Lone Star NGL), for its Mont Belvieu Gas Plant on October
12, 2012. EPA Region 6 issued the GHG PSD permit based on the applicability provisions described, at
the time of permit issuance, at 40 CFR § 52.21(b)(49)(v)(b). In *Utility Air Regulatory Group (UARG) v.
Environmental Protection Agency*, 134 S. Ct. 2427 (2014), the Supreme Court held that EPA may not
treat GHGs alone as an air pollutant for purposes of determining whether a source is a major source
required to obtain a PSD or title V permit and thus invalidated regulations implementing that approach.
On July 6, 2015, EPA finalized a rule to implement the Supreme Court's decision that allows EPA to
issue permit rescissions of GHG PSD permits issued to those sources who were treated as major sources
simply due to their GHG emissions. EPA is issuing notice of the GHG PSD permit rescission in
accordance with the permit rescission regulations at 40 CFR § 52.21(w)(2).

Lone Star NGL has demonstrated that, at the time of permit issuance, the existing stationary source did
not result in an increase in emissions of any regulated New Source Review (NSR) pollutant other than
GHGs in an amount equal to or greater than the nonattainment major source threshold for severe ozone
areas or an amount that is equal to or greater than the applicable PSD significant emission rate level for
that pollutant. The permit authorized GHG emissions for the modification of the existing fractionation
train (FRAC I) and the construction of a second fractionation train (FRAC II). The construction was
planned to occur at the Mont Belvieu Gas Plant, located at 10030 A FM 1942, Mont Belvieu, Chambers
County, Texas 77580. Lone Star NGL received a minor source NSR permit for its proposed non-GHG
emissions from the Texas Commission on Environmental Quality (TCEQ) on May 29, 2012. See permit
number 93813; project number 173813, RN106018260 and CN603855040. The non-GHG emission
rates associated with the TCEQ permit 93813 are as follows: $CO = 118.36$ TPY; $NOx = 37.62$ TPY; $SO_2
= 31.76$ TPY; $PM = 21.94$ TPY, $PM_{10} = 21.94$ TPY; $PM_{2.5} = 21.94$ TPY; and $VOC = 49.54$ TPY. Lone
Star NGL has also asserted to EPA that the EPA-issued GHG PSD permit is not used, or planned to be
used, for any other regulatory or compliance purpose. Based on EPA's review of the information
provided to EPA, Lone Star NGL has provided sufficient information to support the required rescission
elements outlined in 40 CFR § 52.21(w)(2).

Rescission Documents: All documents associated with the rescission of this GHG PSD permit
including Lone Star NGL's rescission request and technical supporting information are part of the
administrative record. The public can access key portions of the administrative record at EPA's website:
http://www.epa.gov/caa-permitting/ghg-psd-permitting-epas-south-central-region

Hard copies of the full administrative record for this action may also be viewed in person (please call at least 24-hours in advance for available viewing times) at the EPA Region 6 address below.

Final Determination: Based on the information provided to EPA Region 6, Lone Star NGL has provided sufficient information to support the required rescission elements outlined in 40 CFR § 52.21(w)(2). With the publication of this notice, this GHG PSD permit rescission for PSD-TX-93813-GHG becomes effective 60 days after publication.
