

Region 6

2016 COMPLIANCE ASSISTANCE WORKSHOP

Spill Prevention, Control and Countermeasure (SPCC) and Facility Response Plan (FRP)

August 17, 2016

8:30 AM — 4:30 PM

EPA Training Facility
16650 Westgrove Drive
Addison, TX 75001

The Workshop is FREE

The United States Environmental Protection Agency (EPA) and the United States Coast Guard (USCG) are hosting a compliance assistance workshop for their oil spill prevention, preparedness and response regulations found at 40 CFR 112 and 33 CFR 154.

The workshop will include a review of the oil spill prevention and preparedness regulations, inspection protocols, potential violations, enforcement process and a detailed discussion of what facilities can do to be better prepared for their compliance inspections. A presentation of case studies will share actual observations found during SPCC/FRP inspections and drills. There will also be a discussion of the recently expanded OSRO classification program impacting response resources within the inland zone. The workshop will conclude with a question and answer session.

Information about EPA's oil spill response, prevention and preparedness program can be found at: <http://www.epa.gov/oilspill>.

Registration is required. Please send an RSVP to: r6spcc@epa.gov. Also include your name, organization, title, phone and email address. The workshop will utilize Adobe Connect for attendees who wish to participate remotely.

You are welcome to share this invitation with others who may be interested in attending. For questions, comments or to remove your name from our email list, please contact: Betsy Fausel at 214-665-6710 or r6spcc@epa.gov.
